Experimental value of the force constant of the SH radical, Sydney Leach—1261(L)

Far ultraviolet absorption spectra of selected isomeric hexenes, Julia T. Gary and Lucy W. Pickett—1266(L)

Far ultraviolet absorption spectra of the isomeric butenes, Julia T. Gary and Lucy W. Pickett—599

Fine structure in absorption spectrum of tricesium cobaltous pentachloride in crystalline state, Shoichiro Yamada and Ryutaro Tsuchida—1273(L)

Free electron model for tropolone, Sadhan Basu—1776(L)

Free electron network model for cyanines and diphenyl polyenes, Sadhan Basu—1270(L)

Frequency assignments for normal aliphatic compounds: I. The normal paraffins in the range 1450 cm^{-1} to 650 cm^{-1}, Hubert Tschamler—1845

Further evidence for the existence of the gauche-form of 1,2-dichloroethane, San-Ichiro Mizushima, Ichiro Nakagawa, Isao Ichishima, and Tatsuo Niyazawa—1614(L)

Hydrogen bonding in sodium trifluoroacetate-trifluoroacetic acid compounds, William Klemperer and George C. Pimentel—1399

I_4: A charge-transfer molecular complex? Harden McConnell—760(L)

Infrared absorption investigation on the rotational isomerism of 1,1,2-trichloroethane, Kenji Kuratani and San-Ichiro Mizushima—1403

Infrared absorption spectra of aqueous HF_2^-, DF_2^-, and HF, Llewellyn H. Jones and Robert A. Penneman—781

Infrared absorption spectra of complex cobalt salts, Douglas G. Hill, and Alexander F. Rosenberg—148(L)

Infrared absorption studies on aqueous complex ions: I. Cyanide complexes of Ag(I) and Au(I) in aqueous solution and adsorbed on anion resin, Llewellyn H. Jones and Robert A. Penneman—965

Infrared and raman spectra of carbon suboxide, H. D. Rix —429

Infrared and raman spectra of 1,1-dimethylhydrazine and trimethylhydrazine, E. R. Shull, J. L. Wood, J. G. Aston, and D. H. Rank—1191

Infrared and raman spectra of formaldehyde-d_1 vapor, D. W. Davidson, B. P. Stoicheff, and H. J. Bernstein—289

Infrared band of a molecular complex between hydrogen fluoride and chlorine trifluoride, J. Paul Pemsler and D. F. Smith—1834

Infrared dichroism in the 13.8μ band of n-$C_{36}H_{74}$ single crystals and polyethylene, Samuel Krimm—567(L)

Absorption Spectra (continued)
Infrared evidence for collagen structures, G. B. B. M. Sutherland, K. Nolen Tanner, and D. L. Wood—1621 (L)
Infrared spectra and structure of LiOH, $LiOH \cdot H_2O$ and the deuterium species. Remark on fundamental frequency of OH^-, Llewellyn H. Jones—217
Infrared spectra of CH_3COONa and CD_3COONa and assignments of vibrational frequencies, Llewellyn H. Jones and Eugene McLaren—1796
Infrared spectra of chemisorbed carbon monoxide, R. P. Eischens, W. A. Pliskin, and S. A. Francis—1786(L)
Infrared spectra of monochlorogermane and monochlorogermane-d_3, R. C. Lord and C. M. Steese—542
Infrared spectra of thionyl chloride and sulfuryl chloride, Dowell E. Martz and Robert T. Lagemann—1193
Infrared spectra studies of BrF_3 and BrF_5, H. M. Haendler, S. W. Bukata, B. Millard, E. I. Goodman, and J. Littman—1939(L)
Infrared spectrum and hydrogen bonding of pyrrole, P. Tuomikoski—2096(L)
Infrared spectrum and molecular constants of $C^{14}O_2$, Alvin H. Nielson and Robert T. Lagemann—36
Infrared spectrum and molecular constants of DBr, Fred L. Keller and Alvin H. Nielsen—294
Infrared spectrum and structure of collagen, Richard M. Badger and A. D. E. Pullin—1142(L)
Infrared spectrum and thermodynamic functions of formamide, J. C. Evans—1228
Infrared spectrum of crystalline nitrogen pentoxide, Roy Ternaishi, and J. C. Decius—896
Infrared spectrum of disilane, H. S. Gutowsky and E. O. Stejskal—939
Infrared spectrum of hydrogen sulfide. II. The 5100 cm^{-1} region, Harry C. Allen, Jr. and Earle K. Plyler—1104
Infrared spectrum of ketene, Børge Bak and F. Allan Andersen—1050
Infrared spectrum of $S^{16}O^{18}O$ and the potential constants of SO_2, Santiago R. Polo, and M. Kent Wilson—900
Infrared spectrum of σ_2 for $B^{10}F_3$ and $B^{11}F_3$, Alvin H. Nielsen—659
Infrared studies of solutions involving aromatics and halogens, Wolfgang Haller, George Jura, and George C. Pimentel—720
Infrared study of the BF_3—BCl_3 reaction, R. E. Nightingale and Bryce Crawford, Jr.—1468(L)
Infrared study of the effect of solvent upon ν(NH) in pyrrole, Marie-Louise Josien and Nelson Fuson—1169
Intensities of the infrared bands of carbon suboxide, R. L. Williams—345(L)
Intensity of the bending mode in carbonyl sulphide, Edward C. Wingfield and Joseph W. Straley—1949(L)
Intermolecular coupling of the out-of-plane bending mode in several carbonates, J. C. Decius—1946(L)
Interpretation of the spectrum of bromoform, Shoji Kojima and Kineo Tsukada—2093(L)
Investigation of the microwave spectrum of pyridine, K. E. McCulloh and Gilbert F. Pollnow—681
Isotope effect in continuous ultraviolet absorption spectra: Methyl bromide-d_3 and chloroform-d, Adon A. Gordus and Richard B. Bernstein—790
J=0→1 rotational transition of trifluoroiodomethane, Fred Sterzer—2094(L)
Lower electronic states of the free NH_2 radical, Jiro Higuchi—1467(L)
Maxima in the potential energy-distance functions of diatomic molecules, R. F. Barrow—573(L)
Microwave absorption by the nonpolar gas CO_2, G. Birnbaum, A. A. Maryott, and P. F. Wacker—1782(L)
Microwave absorption in the mixture (phenyl isothiocyanate +diethylamine), P. K. Kadaba—1465(L)
Microwave investigation of hindered rotation and inversion of methylamine, K. Shimoda, T. Nishikawa, and T. Itoh —1456(L)
Microwave investigation of the ionization of hydrogen-oxygen and acetylene-oxygen flames, Kurt E. Schuler, and Joseph Weber—491
Microwave spectra and structures of methyl mercury chloride and bromide, Walter Gordy and John Sheridan —92
Microwave spectra, structure, and dipole moment of stable pentaborane, Henry J. Hrostowski and Rollie J. Myers —262
Microwave spectrum and barrier to internal rotation of nitromethane, Eileen Tannenbaum, Russell D. Johnson, Rollie J. Myers, and William D. Gwinn—949(L)
Microwave spectrum and dipole moment of pyridine, Billy B. DeMore, W. S. Wilcox, and J. H. Goldstein—876
Microwave spectrum and molecular structure of $(CH_3)_3SiF$, R. C. Gunton, J. F. Ollom, and H. N. Rexroad—1942(L)
Microwave spectrum and properties of vinylene carbonate, Geo. R. Slayton, J. W. Simmons, and J. H. Goldstein—1678
Microwave spectrum and structure of benzonitrile, David R. Lide, Jr.—1577
Microwave spectrum of benzonitrile, Gunnar Erlandsson —1152(L)
Microwave spectrum of cyclopentanone, Gunnar Erlandsson—563(L)
Microwave spectrum of ethyl chloride, Roselin S. Wagner and B. P. Dailey—1459(L)
Microwave spectrum of fluorobenzene, K. E. McCulloh and Gilbert F. Pollnow—1144(L)
Microwave spectrum of formic acid, Ralph Trambarulo and Paul M. Moser—1622(L)
Microwave spectrum of hydrogen peroxide, J. T. Massey and D. R. Bianco—442
Microwave spectrum of pyridine, Børge Bak, Lise Hansen, and John Rastrup-Anderson—565(L)
Microwave spectrum of vinyl cyanide, W. S. Wilcox, J. H. Goldstein, and J. W. Simmons—516
Microwave spectrum of vinyl iodide, C. D. Cornwell and R. L. Poynter—1257(L)
Millimeter wave spectra and centrifugal stretching constants of the methyl halides, W. J. Orville Thomas, J. T. Cox, and Walter Gordy—1718
N^{15} isotope shift of the perpendicular bending frequency in KNO_3 and $NaNO_3$, J. C. Decius—1941(L)
Near infrared spectrum and the internuclear distances of nitrous oxide, A. E. Douglas and C. K. Møller—275
Near ultraviolet absorption spectrum of para-difluorobenzene vapor, C. Dewey Cooper—503
New analysis of the effect of polar solvents upon ν(NH) of pyrrole, Marie-Louise Josien and Nelson Fuson—1264 (L)
Nitrogen electronegativity correction in free electron network theory, Sadhan Basu—1625(L)
Photobleaching and photorecovery of dyes, Gerald Oster and Neil Wotherspoon—157(L)
Photochemical activity of salts of uranium in solutions at the temperature of liquid nitrogen, Simon Freed and Kenneth M. Sancier—928
Photoconductivity of anthracene. I, A. G. Chynoweth and W. G. Schneider—1021
Photoionization and total absorption cross section of gases. I. Ionization potentials of several molecules. Cross sections of NH_3 and NO, K. Watanabe—1564

Photolysis of ammonia at 1849A in a flow system, C. C. McDonald, A. Kahn, and H. E. Gunning—908
Photon-induced diffusion in thin films and single crystals of potassium iodide, C. J. Delbecq and P. H. Yuster—921
Polarization of π-electron transitions in aromatic molecules, Donald S. McClure—1256(L)
Polarized infrared spectrum of $KAu(CN)_2$: Revision and refinement, Llewellyn H. Jones—1135(L)
Polarized ultraviolet spectrum of tetracene single crystals by a photoconductance method, A. Bree and L. E. Lyons —1630(L)
Polar solvent effects on the absorption spectra of metallic complexes, Kazuo Nakamoto, Masahisa Kobayashi and Ryutaro Tsuchida—957(L)
Polymorphism in solution of *cis*- and *trans*-β-methoxy-*p*-nitrochalcone, Yoshiyuki Urushibara, Fujiro Iimura, and Kenro Ikeda—1943(L)
Potassium bromide disk method for the infrared studies of coordination compounds, Thomas J. Lane, D. N. Sen, and J. V. Quagliano—1855
Pressure broadening of linear molecules I, Harold Feeny, Henry Lackner, Paul Moser, and William V. Smith—79
Quantum yield of *para*-diazo (N—N, dimethylaniline zinc chloride dihydrate at 3660A, Albert Baril, Jr.—1275(L)
Raman and infrared spectra of CF_3Br and CF_3I, Walter F. Edgell and Charles E. May—1808
Regularity of the *f*-center maxima in fused silica and α quartz, Alvin J. Cohen—570(L)
Relation between bond length and stretching frequency for the carbonyl group, M. Margoshes, F. Fillwalk, V. A. Fassel, and R. E. Rundle—381
Relation between energy levels of substituent groups and electron migration effects in some monosubstituted benzenes, Saburo Nagakura and Jiro Tanaka—236
Rotational constants of GeH_3D and $GeHD_3$, Louis P. Lindeman and M. Kent Wilson—1723
Rotational constants of SiH_3D, Santiago R. Polo and M. Kent Wilson—1559
Rotational spectrum of PH_3, Harald H. Nielsen—1383
Rule of mutual exclusion, T. Venkatarayudu—1269(L)
Second-order quadrupole effects in asymmetric tops. The microwave spectrum of vinyl iodide, H. W. Morgan and J. H. Goldstein—1427
Semiempirical treatment of $n-\pi$ transitions, Lionel Goodman and Harrison Shull—1138(L)
Silver-activated alkali halides, H. W. Etzel and J. H. Schulman—1549
Simultaneous vibrational transitions in the infrared absorption spectra of compressed gases, J. Fahrenfort and J. A. A. Ketelaar—1631(L)
Single-triplet absorption bands in some halogen substituted aromatic compounds, Donald S. McClure, Norman W. Blake, and Philip L. Hanst—255
Solution spectra and oscillator strengths of electronic transitions of pyridine and some monosubstituted derivatives, Harold P. Stephenson—1077
Spectroscopic evidence for stabilized HO_2 radicals, Paul A. Giguere—2085(L)
Spectroscopic examination of the NH_3-HNO_3 and NH_3-NO_2 diffusion flames, Milton Farber and Alfred J. Darnell—1261(L)
Stabilization of free radicals from the decomposition of hydrazoic acid, I. L. Mador and M. C. Williams—1627 (L)
Stabilization of methyl radical, I. L. Mador—1617(L)
Stark effect in the microwave spectra of KCl and NaCl, P. A. Tate and M. W. P. Strandberg—1380
Structure of the perrhenate ion, Howard H. Claassen and A. J. Zielen—707
Studies of ionization efficiency. Part IV. The electron spectra of some simple molecules, J. D. Morrison—1219
Substituted methanes. XVIII. Vibrational spectra of $C^{13}H_3I$, Richard B. Bernstein, Forrest F. Cleveland, and Fred L. Voelz—193
Substituted methanes. XX. Potential constants and calculated thermodynamic properties for some dibromomethanes, Jerome M. Dowling and Arnold G. Meister—1042
Symmetry classification of the energy levels of some triarylmethyl free radicals and their cations, Ting Li Chu and S. I. Weissman—21
Temperature dependence of microwave absorption coefficient, Krishnaji and Prem Swarup—1456(L)
Temperature dependence of the microwave absorption of NH_3, G. Birnbaum and A. A. Maryott—1457(L)
Temperature dependence of the ultraviolet absorption spectrum of naphthalene in solution, Riccardo Passerini and Ian G. Ross—1012
Temperature-dependent color changes in some merocyanines, Yehuda Hirshberg and Ernst Fischer—572(L)
Theoretical evaluation of the normal frequencies of vibration of the ethylene oxide molecule, Samuel A. Stone—925
Theoretical study of the colored alkali oxides, Inga Fischer-Hjalmars and Barbro Grabe—1259(L)
Theory of absorption spectra of catacondensed hydrocarbons according to Platt's circular model of free electrons, Gentaro Araki and Tomokazu Murai—954
Theory of absorption spectra of unsymmetrical cyanines, Gentaro Araki and Sigeru Huzinaga—1141(L)
Thermodynamic and spectroscopic study of gaseous magnesium oxide, Leo Brewer and Richard F. Porter—1867
s-Triazine. II. The near ultraviolet absorption spectrum, R. C. Hirt, F. Halverson, and R. G. Schmitt—1148(L)
s-Triazine. III. The infrared spectrum, John E. Lancaster and Norman B. Colthup—1149(L)
s-Triazine. V. The raman spectrum, Robert F. Stamm and John E. Lancaster—1280(L)
l-Type doubling in C_2H_2 and HCN, T. A. Wiggins, J. N. Shearer, E. R. Shull, D. H. Rank—547
Vacuum ultraviolet absorption spectra of iodine and bromine, Noel S. Bayliss and John V. Sullivan—1615 (L)
Variation in the quadrupole coupling constant with vibrational state in the methyl halides, J. Kraitchman and B. P. Dailey—1477
Vibrational assignment and thermodynamic properties of *N*-dimethylaminodiborane, D. E. Mann—762(L)
Vibrational intensities in diatomic infrared transitions. The vibrational matrix elements for CO, Robert C. Herman and Kurt E. Shuler—481
Vibrational spectra and calculated thermodynamic properties of ethyl chloride and 1,1-dichloroethane, Lester W. Daasch, C. Y. Liang, and J. Rud Nielsen—1293
Vibrational spectra and structure of solid hydroxylamine and deuterohydroxylamine, R. E. Nightingale and E. L. Wagner—203
Vibrational spectra of $CF_2=CHD$ and $CF_2=CD_2$, W. F. Edgell and Casper J. Ultee—1983
Vibrational spectra of *N*-dimethylaminodiborane, D. E. Mann—70
Vibrational spectra of trifluoroethylene and trifluoroethylene-d_1, D. E. Mann, N. Acquista, and Earle K. Plyler—1586
Vibrational spectrum and the specific heat of germanium and silicon, Yü-Chang Hsieh—306
Vibrational spectrum of bromotrifluoroethylene, D. E. Mann, N. Acquista, and Earle K. Plyler—1199

Absorption Spectra (continued)
Vibrational spectrum of hexafluoro-2-butyne, Foil A. Miller and Robert P. Bauman—1544
Wavelength shifts in the near ultraviolet spectra of fluorinated benzenes, H. Spooner—234
Infrared of
Alkyl iodides, Robert H. Schuler—947(L)
Aromatics and halogens, Wolfgang Haller, George Jura, and George C. Pimentel—720
BF_3—BCl_3, R. E. Nightingale and Bryce Crawford, Jr.—1468(L)
$B^{10}F_3$ and $B^{11}F_3$, Alvin H. Nielsen—659
BrF_3 and BrF_5, H. M. Haendler, S. W. Bukata, B. Millard, E. I. Goodman, and J. Littman—1939(L)
Bromine chloride, H. C. Mattraw, C. F. Pachucki, and N. J. Hawkins—1117
Bromoform, Shoji Kojima and Kineo Tsukada—2093(L)
Bromotrifluoroethylene, D. E. Mann, N. Acquista, and Earle K. Plyler—1199
Carbon monoxide, R. P. Eischens, W. A. Pliskin, and S. A. Francis—1786(L)
Carbon suboxide, H. D. Rix—429
Carbon suboxide, R. L. Williams—345(L)
Carbonates, J. C. Decius—1946(L)
Carbonyl group, M. Margoshes, F. Fillwalk, V. A. Fassel, and R. E. Rundle—381
Carbonyl sulphide, Edward C. Wingfield and Joseph W. Straley—1949(L)
C_2D_2, Robert M. Talley and Alvin H. Nielsen—2030
CF_3Br and CF_3I, Walter F. Edgell and Charles E. May—1808
C_2H_2 and HCN, T. A. Wiggins, J. N. Shearer, E. R. Shull, D. H. Rank—547
CH_3COONa and CD_3COONa, Llewellyn H. Jones and Eugene McLaren—1796
$C^{13}H_3I$, Richard B. Bernstein, Forrest F. Cleveland, and Fred L. Voelz—193
$C^{14}O_2$, Alvin H. Nielsen and Robert T. Lagamann—36
CO, Robert C. Herman and Kurt E. Shuler—481
Cobalt salts, Douglas G. Hill, and Alexander F. Rosenberg—148(L)
Collagen, Richard M. Badger and A. D. E. Pullin—1142(L)
Compressed gases, J. Fahrenfort and J. A. A. Ketelaar—1631(L)
Coordination compounds, Thomas J. Lane, D. N. Sen, and J. V. Quagliano—1855
Cyanide complexes of Ag(I) and Au(I) Llewellyn H. Jones and Robert A. Penneman—965
DBr, Fred L. Keller and Alvin H. Nielsen—294
Diatomic molecules, Henry Aroeste—1273(L)
Dibromomethanes, Jerome M. Dowling and Arnold G. Meister—1042
Disilane, H. S. Gutowsky and E. O. Stejskal—939
Ethyl chloride and 1,1-dichloroethane, Lester W. Daasch, C. Y. Liang, and J. Rud Nielsen—1293
Formaldehyde-d_1 vapor, D. W. Davidson, B. P. Stoicheff, and H. J. Bernstein—289
Formamide, J. C. Evans—1228
GeH_3D and $GeHD_3$, Louis P. Lindeman and M. Kent Wilson—1723
Halogenated ethanes, Norbert W. Luft—155(L)
Hexafluoro-2-butyne, Foil A. Miller and Robert P. Bauman—1544
Hexamethyldisilane and related compounds, C. C. Cerato, J. L. Lauer, and H. C. Beachell—1
HF_2^-, DF_2^-, and HF, Llewellyn H. Jones and Robert A. Penneman—781
Hydrogen fluoride and chlorine trifluoride, J. Paul Pemsler and D. F. Smith—1834
Hydrogen sulfide. Harry C. Allen, Jr. and Earle K. Plyler—1104
Hydroxylamine and deuterohydroxylamine, R. E. Nightingale and E. L. Wagner—203
$KAu(CN)_2$, Llewellyn H. Jones—1135(L)
Ketene, Børge Bak and F. Allan Andersen—1050
KNO_3 and $NaNO_3$, J. C. Decius—1941(L)
LiOH, $LiOH \cdot H_2O$, Llewellyn H. Jones—217
Methyl radical, I. L. Mador—1617(L)
Monochlorogermane and monochlorogermane-d_3, R. C. Lord and C. M. Steese—542
n-$C_{36}H_{74}$ and polyethylene, Samuel Krimm—567(L)
n-dimethylaminodiborane, D. E. Mann—70, 762(L)
Nitryl chloride, Raymond Ryason and M. Kent Wilson—2000
Nitrous oxide, A. E. Douglas and C. K. Møller—275
NO_2, Melvin Brown and M. Kent Wilson—955(L)
N-paraffins polythene, R. S. Stein and G. B. B. M. Sutherland—1993
OH, B. H. Elliott and S. S. Penner—101
1,1-dimethylhydrazine and trimethylhydrazine, E. R. Shull, J. L. Wood, J. G. Aston, and D. H. Rank—1191
1,1,2-Trichloroethane, Kenji Kuratani and San-Ichiro Mizushima—1403
1,2-dichloroethane, San-Ichiro Mizushima, Ichiro Nakagawa, Isao Ichishima, and Tatsuo Miyazawa—1614(L)
1,2-dichloroethane, Ichiro Nakagawa and San-Ichiro Mizushima—759(L)
Paraffins, Hubert Tschamler—1845
Perrhenate ion, Howard H. Claassen and A. J. Zielen—707
PH_3, Harald H. Nielsen—1383
Pyrrole, Marie-Louise Josien and Nelson Fuson—1169, 1264(L)
Pyrrole, P. Tuomikoski—2096(L)
SiH_3D, Santiago R. Polo and M. Kent Wilson—1559
Sodium trifluoroacetate-trifluoroacetic acid, William Klemperer and George C. Pimentel—1399
$S^{16}O^{18}O$, Santiago R. Polo, and M. Kent Wilson—900
s-Triazine, John E. Lancaster and Norman B. Colthup—1149(L)
s-Triazine. Robert F. Stamm and John E. Lancaster—1280(L)
Tellurium, Herbert B. Callen—518
Thionyl chloride and sulfuryl chloride, Dowell E. Martz and Robert T. Lagemann—1193
Trifluoroethylene and trifluoroethylene-d_1, D. E. Mann, N. Acquista, and Earle K. Plyler—1586
Microwave of
Benzonitrile, Gunnar Erlandsson—1152(L)
Benzonitrile, David R. Lide, Jr.—1577
$(CH_3)_3SiF$, R. C. Gunton, J. F. Ollom, and H. N. Rexroad—1942(L)
CO_2, G. Birnbaum, A. A. Maryott, and P. F. Wacker—1782(L)
Cyclopentanone, Gunnar Erlandsson—563(L)
Ethyl chloride, Roselin S. Wagner and B. P. Dailey—1459(L)
Fluorobenzene, K. E. McCulloh and Gilbert F. Pollnow—1144(L)
Formic acid, Ralph Trambarulo and Paul M. Moser—1622(L)
Hydrogen-oxygen and acetylene-oxygen flames, Kurt E. Schuler, and Joseph Weber—491
Hydrogen peroxide, J. T. Massey and D. R. Bianco—442
KCl and NaCl, P. A. Tate and M. W. P. Strandberg—1380
Linear molecules Harold Feeny, Henry Lackner, Paul Moser, and William V. Smith—79
Methyl amine, David R. Lide, Jr.—1613(L)

Methylamine, K. Shimoda, T. Nishikawa, and T. Itoh—1456(L)
Methyl halides, J. Kraitchman and B. P. Dailey—1477
Methyl halides, W. J. Orville Thomas, J. T. Cox, and Walter Gordy—1718
Methyl mercury chloride and bromide, Walter Gordy and John Sheridan—92
NH_3, G. Birnbaum and A. A. Maryott—1457(L)
Nitromethane, Eileen Tannenbaum, Russell D. Johnson, Rollie J. Myers, and William D. Gwinn—949(L)
OH, T. M. Sanders, Jr., A. L. Schawlow, G. C. Dousmanis, and C. H. Townes—245
1,1-difluoroethane, N. Solimene and B. P. Daily—2042
Pentaborane, Henry J. Hrostowski and Rollie J. Myers—262
Phenyl isothiocyanate+diethylamine, P. K. Kadaba—1465(L)
Pyridine, Børge Bak, Lise Hansen, and John Rastrup-Andersen—565(L), 2013
Pyridine, Billy B. DeMore, W. S. Wilcox, and J. H. Goldstein—876
Pyridine, K. E. McCulloh and Gilbert F. Pollnow—681
SO_2, Daniel Kivelson—904
Trifluoroiodomethane, Fred Sterzer—2094(L)
Vinyl cyanide, W. S. Wilcox, J. H. Goldstein, and J. W. Simmons—516
Vinyl iodide, C. D. Cornwell and R. L. Poynter—1257(L)
Vinyl iodide, H. W. Morgan and J. H. Goldstein—1427
Vinylene carbonate, Geo. R. Slayton, J. W. Simmons, and J. H. Goldstein—1678
Of Crystals
Alkali halides, H. W. Etzel and J. H. Schulman—1549
Chlorophyll *a*, Earl E. Jacobs and A. Stanley Holt—142(L)
Dicyclopentadienyl-iron, S. Yamada, A. Nakahara and R. Tsuchida—1620(L)
Diformylhydrazine, Shoichiro Yamada and Ryutaro Tsuchida—1629(L)
Germanium and silicon, Yü-Chang Hsieh—306
HF_2^-, DF_2^-, and HF, Llewellyn H. Jones and Robert A. Penneman—781
Hydroxylamine and deuterohydroxylamine, R. E. Nightingale and E. L. Wagner—203
KNO_3 and $NaNO_3$, J. C. Decius—1941(L)
$LiOH \cdot H_2O$ and the deuterium species. Llewellyn H. Jones—217
Naphthalene, Donald S. McClure—1668
n-$C_{36}H_{74}$ and polyethylene, Samuel Krimm—567(L)
Nitrite ion, William G. Trawick and W. H. Eberhardt—1462(L)
Nitrogen pentoxide, Roy Ternaishi, and J. C. Decius—896
Paraffins, Hubert Tschamler—1845
Ultraviolet of
'acenes, D. P. Craig, P. C. Hobbins, and J. R. Walsh—1616(L)
Acetylene, K. Keith Innes—863
Aromatic molecules, Donald S. McClure—1256(L)
Borine carbonyl, H. J. Galbraith—1461(L)
Butenes, Julia T. Gary and Lucy W. Pickett—599
Cata-condensed hydrocarbons, William Moffitt—320
Cis- and *trans-β*-methoxy-*p*-nitrochalcone, Yoshiyuki Urushibara, Fujiro Iimura, and Kenro Ikeda—1943(L)
Dicyclopentadienyl-iron, Shoichiro Yamada, Akitsugu Nakahara, and Ryutaro Tsuchida—1620(L)
Dimethylpolyenes, P. Nayler and N. C. Whiting—2091(L)
Fluorinated benzenes, H. Spooner—234
Hexenes, Julia T. Gary and Lucy W. Pickett—1266(L)
I_4, Harden McConnell—760(L)
Iodine and bromine, Noel S. Bayliss and John V. Sullivan—1615(L)
Magnesium oxide, Leo Brewer and Richard F. Porter—1867
Metallic complexes, Kazuo Nakamoto, Masahisa Kobayashi and Ryutaro Tsuchida—957(L)
Methyl bromide-d_3 and chloroform-*d*, Adon A. Gordus and Richard B. Bernstein—790
Monosubstituted benzenes Saburo Nagakura and Jiro Tanaka—236
Naphthalene, Donald S. McClure—1668
Naphthalene, Riccardo Passerini and Ian G. Ross—1012
NH_3 and NO, K. Watanabe—1564
NH_3—HNO_3 and NH_3—NO_2, Milton Farber and Alfred J. Darnell—1261(L)
Nitrite ion, William G. Trawick and W. H. Eberhardt—1462(L)
Nitrobenzene, Anneliese Wenzel—1623(L)
Para-difluorobenzene vapor, C. Dewey Cooper—503
Pentenes, Dorothy Semenow, Anna J. Harrison, and Emma P. Carr—638
Phenyl radicals, H. H. Jaffé—1430
Pyridine, Harold P. Stephenson—1077
SH, Sydney Leach—1261(L)
s-Triazine, R. C. Hirt, F. Halverson, and R. G. Schmitt—1148(L)
Tetracene, A. Bree and L. E. Lyons—1630(L)
Tricesium cobaltous pentachloride, Shoichiro Yamada and Ryutaro Tsuchida—1273(L)

Accommodation Coefficients
Comparative study of accommodation coefficients by the temperature jump and low-pressure methods and thermal conductivities of He, Ne, and CO_2, Lloyd B. Thomas and Ralph C. Golike—300

Adsorption (see **Surface Phenomena**)

Apparatus and Methods
Approximate method of evaluating lattice sums of r^{-n} for graphite, A. D. Crowell—1397
Calculation of the fraction of effusing molecules which strike a collector plate above a channel hole, Robert D. Freeman and Alan W. Searcy—1137(L)
Effect of channel holes on the force exerted by effusing vapors, Robert D. Freeman and Alan W. Searcy—762(L)
Examination of methods for detecting OH, T. M. Sanders, Jr., A. L. Schawlow, G. C. Dousmanis, and C. H. Townes—245
Explanation of certain types of curves found in high-frequency techniques, H. W. Hamme, H. L. Grove, and J. L. Kassner—944(L)
Matrix isolation method for the experimental study of unstable species, Eric Whittle, David A. Dows, and George C. Pimentel—1943(L)
Potassium bromide disk method for the infrared studies of coordination compounds, Thomas J. Lane, D. N. Sen, and J. V. Quagliano—1855
Preparation and isolation of carrier-free As^{74} from germanium cyclotron targets, Mino Green and James A. Kafalas—760(L)
Techniques in the study of emission spectra of polyatomic molecules—The spectra of benzaldehyde and acetophenone, G. Wilse Robinson—1384

Catalysis
Homogeneous activation of molecular hydrogen by cupric acetate, J. Halpern and R. G. Dakers—1272(L)

Centrifugation
Determination of concentrations in the ultracentrifugation of two-component systems. R. Trautman, V. N. Schumaker, W. F. Harrington, and H. K. Schachman—555

Centrifugation (continued)
Generalization of the radial dilution square law in ultracentrifugation, Rodes Trautman and Verne Schumaker —551
Thermodynamics of equilibrium in the ultracentrifuge, T. Fraser Young, Kurt A. Kraus, and James S. Johnson—878
Chemical Reactions (see **Kinetics of Reactions**)
Conductance
Concerning the coexistant phases in the system NaCl–H_2O above 374°C, James Fogo, Sidney W. Benson, and Charles S. Copeland—1942(L)
Conduction by oxide ion in the solid state, J. L. Weininger and P. D. Zemany—1469(L)
Conductivity of supercritical solutions of sodium chloride and water, James T. Corwin and Gwilym E. Owen—1257(L)
Effect of oxygen on the photoconductivity of anthracene. II, A. G. Chynoweth—1029
Electrical conductivity of supercritical solutions of sodium chloride and water, James K. Fogo, Sidney W. Benson, and Charles S. Copeland—212
Explanation of certain types of curves found in high-frequency techniques, H. W. Hamme, E. L. Grove, and J. L. Kassner—944(L)
Frequency of the irradiating light as a determinant of the Joshi effect in oxygen under silent electric discharge, S. R. Mohanty—1010
Germanium-oxygen system, Michael Hoch and Herrick L. Johnston—1376
Oxidation ions in hydrocarbons on ultraviolet irradiation, Andrew Gemant—1705
Photoconductivity of anthracene. I, A. G. Chynoweth and W. G. Schneider—1021
Polarization effects in the ionic conductivity of silver bromide, Robert J. Friauf—1329
The "Threshold potential" of the ac electrodeless discharge, S. R. Mohanty—2095(L)
Van Der Waals adsorption as a determinant of Joshi effect, N. A. Ramaiah—1507
Crystal Structure
Boron arrangement in a B_6 hydride, K. Eriks, William N. Lipscomb, and Riley Schaeffer—754(L)
Cation distribution and *g* factors of certain spinels containing Ni^{++}, Mn^{++}, Co^{++}, Al^{+++}, Ga^{+++}, and Fe^{+++}, Selma Greenwald, Stanley J. Pickart, and Frederick H. Grannis—1597
Crystal and molecular structure of B_5H_{11}, Louis R. Lavine and William N. Lipscomb—614
Germanium-oxygen system, Michael Hoch and Herrick L. Johnston—1376
Hafnium silicides, Benjamin Post, Frank W. Glaser, and David Moskowitz—1264(L)
Infrared dichroism in the 13.8μ band of *n*-$C_{36}H_{74}$ single crystals and polyethylene, Samuel Krimm—567(L)
Lattice constants of the alkali borohydrides and the low-temperature phase of sodium borohydride, S. C. Abrahams and J. Kalnajs—434
Lattice parameters of the $FeFe_{(2-x)}Cr_xO_4$ spinel system, H. J. Yearian, J. M. Kortright, and R. H. Langenheim —1196
Structure for Collagen, F. H. C. Crick—347(L)
Structure of the nitric oxide dimer, W. J. Orville Thomas —1267(L)
s-Triazine. I. The unit cell, L. A. Siegel and E. F. Williams—1147(L)
Crystalline State
Adsorption of carbon dioxide on nickel single crystal surfaces using a radio-tracer technique, J. A. Dillon, Jr. and H. E. Farnsworth—1601
Anomalous magnetic behavior of UI_3 from 1–4.2°K, L. D. Roberts, D. E. Lavalle, and R. A. Erickson—1145(L)
Anomalous rotatory dispersion of quartz above 3.7μ? C. D. West—749(L)
Approximate method of evaluating lattice sums of r^{-n} for graphite, A. D. Crowell—1397
Assignment of the intense 'acene absorption systems, D. P. Craig, P. C. Hobbins, and J. R. Walsh—1616(L)
Bromine quadrupole spectra and Hammett's sigma values, P. J. Bray—1787(L)
Calculation of the distribution of relaxation times for a single-axis rotator using the random-jump hypothesis, John D. Hoffman—156(L)
Calculation of the moments of the vibrational frequency distributions of single crystals, Thomas H. Walnut—692
Cation distribution and *g* factors of certain spinels containing Ni^{++}, Mn^{++}, Co^{++}, Al^{+++}, Ga^{+++}, and Fe^{+++}, Selma Greenwald, Stanley J. Pickart, and Frederick H. Grannis—1597
Cl in SO_2Cl pure quadrupole spectra, P. J. Bray and D. Esteva—570(L)
Color centers in synthetic quartz, George W. Arnold, Jr. —1259(L)
Conduction by oxide ion in the solid state, J. L. Weininger and P. D. Zemany—1469(L)
Configuration coordinate model for luminescence in KCl: Tl, Peter D. Johnson—1143(L)
Covalent boron-boron bonds in crystals of certain metal borides, Inga Fischer-Hjalmars and Stig Flodmark—1950 (L)
Crystal and molecular structure of B_5H_{11}, Louis R. Lavine and William N. Lipscomb—614
Crystal structure of paradichlorobenzene, Bruce C. Lutz—1618(L)
Curie point transitions in phosphides and arsenides of manganese, Keith H. Sweeny and Allen B. Scott—917
Determination of adsorption energy heterogeneity of solid surfaces, Jurgen M. Homig and Edward L. Hill—851
Deviations from additivity of the intermolecular field at high densities, Laurens Jansen and Zaka I. Slawsky—1701
Dichroism of the crystal of diformylhydrazine, Shoichiro Yamada and Ryutaro Tsuchida—1629(L)
Dielectric anomaly of ammonium sulfate at its transition temperature, Kan-Ichi Kaniyoshi and Toshihiko Miyamoto—756(L)
Dielectric properties of hydrogen halides. II. Hydrogen chloride, Richard W. Swenson and Robert H. Cole—284
Dielectric properties of some long-chain fatty acids and their methyl esters in the microwave region, T. J. Buchanan—578
Different ice forms under ordinary conditions, R. M. Vanderberg and J. W. Ellis—2088(L)
Effect of compression and of hydrostatic pressure on the diffusion anistropy in zinc, T. Liu and H. G. Drickamer —312
Effect of compressive stress on self-diffusion in zinc, A. W. Lawson—1948(L)
Effect of oxygen on the photoconductivity of anthracene. II, A. G. Chynoweth—1029
Elastic constants of AgBr at 28°C, D. S. Tannhauser and A. W. Lawson—2092(L)
Electrical properties of some complex compounds. Part 1, P. E. Fielding—1153
Electrical properties of some complex compounds. Part 2, P. E. Fielding and D. P. Mellor—1155
Electrically and elastically active relaxation modes, Y. Haven and J. H. van Santen—1146(L)
Electron trap distributions in phosphors, J. M. Honig—1689

Electronic structure, infrared absorption, and Hall effect in tellurium, Herbert B. Callen—518
Equivalence of Chang's and Nakamura's theories of hindered rotation in molecular crystals, Hubert M. James and Theodore J. Krieger—959(L)
Exchange energy of electrons in metals and ionic crystals, John R. Reitz—595
Fine structure in absorption spectrum of tricesium cobaltous pentachloride in crystalline state, Shoichiro Yamada and Ryutaro Tsuchida—1273(L)
Fluorescence and thermoluminescence of ice, Leonard I. Grossweiner and Max S. Matheson—1514
Frequency assignments for normal aliphatic compounds: I. The normal paraffins in the range 1450 cm^{-1} to 650 cm^{-1}, Hubert Tschamler—1845
Frequency spectrum and specific heat of a face-centered cubic lattice. I. Carl W. Garland and George Jura—1108
Frequency spectrum and specific heat of a face-centered cubic lattice. II. Low temperature region, Carl W. Garland and George Jura—1114
Heterogeneous nucleation of crystals from vapor, G. M. Pound, M. T. Simnad, and Ling Yang—1215
Hyperfine splittings in polyatomic free radicals, S. I. Weissman—1378
Influence of a magnetic field on the microwave dielectric constant of a liquid crystal, E. F. Carr and R. D. Spence—1481
Infrared dichroism in the 13.8μ band of n-$C_{36}H_{74}$ single crystals and polyethylene, Samuel Krimm—567(L)
Infrared reflection spectra of phosphate and arsenate crystals, George M. Murphy, George Weiner, and John J. Oberly—1322
Infrared spectra and structure of LiOH, $LiOH \cdot H_2O$ and the deuterium species. Remark on fundamental frequency of OH^-, Llewellyn H. Jones—217
Infrared spectrum of crystalline nitrogen pentoxide, Roy Ternaishi and J. C. Decius—896
Inter- and intramolecular energy transfer processes. 4. Hydrogen-hydrocarbon systems, Margaret M. Moodie and C. Reid—1126
Intermolecular coupling of the out-of-plane bending mode in several carbonates, J. C. Decius—1946(L)
Intermolecular forces and crystal structures of rare gases, L. Jansen and J. M. Dawson—1619(L)
Intermolecular potentials for some simple nonpolar molecules, Edward A. Mason and William E. Rice—843
Lattice constants of the alkali borohydrides and the low-temperature phase of sodium borohydride, S. C. Abrahams and J. Kalnajs—434
Lattice dynamics of body-centered and face-centered cubic metallic elements. II, Jules de Launay—1676
Lattice energies of copper subgroup and thallous halides, Aubrey P. Altshuller—1136(L)
Lattice parameters of the $FeFe_{(2-x)}Cr_xO_4$ spinel system, H. J. Yearian, J. M. Kortright, and R. H. Langenheim—1196
Lattice vibration specific heat of graphite, Takeo Nagamiya and Kozo Komatsu—1457(L)
Lattice vibrational spectrum of imperfect crystals, Kenneth F. Stripp and John G. Kirkwood—1579
Librational heat capacity of ice and of heavy ice, R. W. Blue—280
Magnetic behavior of the system CoO–MgO at elevated temperatures, Norman Elliott—1924
Magnetic dipolar interactions in MnO and in ferrites, Jerome I. Kaplan—1709
N^{15} isotope shift of the perpendicular bending frequency in KNO_3 and $NaNO_3$, J. C. Decius—1941(L)
Nonequivalent zinc bonds in chalcophanite, D. P. Craig and A. D. Wadsley—346(L)
Nuclear quadrupole resonance in ethyl chloroformate and ethyl trichloroacetate, T. L. Weatherly and Quitman Williams—958(L)
Nuclear quadrupole resonances in solid aryl bromides and iodides, R. G. Barnes O. B. Miller, and F. O. Wooten—946(L)
Nuclear quadrupole resonances in solid bromine in iodine compounds, A. L. Schawlow—1211
Occurrence of natural p–n junctions in lead solenide, Arthur E. Goldberg and George R. Mitchell—220
Origin of the fluorescence in self-activated ZnS, CdS, and ZnO, F. A. Kröger and H. J. Vink—250
Paramagnetic resonance in phthalocyanine, chlorophyll, and haemoglobin derivatives, D. J. E. Ingram and J. E. Bennett—1136(L)
Photoconduetivity of anthracene. I, A. G. Chynoweth and W. G. Schneider—1021
Photographic latent image. III. Dimensional changes in silver bromide following exposure, Maurice L. Huggins—1389
Photon-induced diffusion in thin films and single crystals of potassium iodide, C. J. Delbecq and P. H. Yuster—921
Polar *versus* nonpolar ice, R. E. Rundle—344(L)
Polarization effects in the ionic conductivity of silver bromide, Robert J. Friauf—1329
Polarization of π-electron transitions in aromatic molecules, Donald S. McClure—1256(L)
Proton magnetic resonance in an ammonium chloride single crystal, R. Bersohn and H. S. Gutowsky—651
Pure quadrupole spectra of metal bromates, Kenji Shimomura, Toshimoto Kushida, Noriyoshi Inoue, and Yoshiro Imaeda—1944(L)
Pure quadrupole spectra of solid bromine and iodine compounds, Kenji Shimomura, Toshimoto Kushida, Noriyoshi Inoue, and Yoshiro Imaeda—350(L)
Pure quadrupole spectrum of solid hexachlorobenzene and its interpretation, Jules Duchesne and André Monfils—562(L)
Quantum-mechanical calculation of the surface energy of crystalline lithium fluoride, B. M. E. van der Hoff and G. C. Benson—475
Redetermination of the crystal structure of lithium sulfate monohydrate $Li_2SO_4 \cdot H_2O$, Allen C. Larson and Lindsay Helmholz—2049
Resonance energy of graphite, Gordon M. Barrow—953(L)
Regularity of the f-center maxima in fused silica and α quartz, Alvin J. Cohen—570(L)
Residual entropy of the polar structure of ice, William N. Lipscomb—344(L)
Resonance energy of graphite, G. S. Colladay—2085(L)
Rotation in solid mixtures of neohexane and cyclopentane from 20°K to their melting points, J. G. Aston, Bouwe Bolger, Ralph Trambarulo, and H. Segall—460
Rule of mutual exclusion, T. Venkatarayudu—1269(L)
Selection rules and frequencies of the skeletal vibrations of long chain polymers in the crystalline state, C. Y. Liang, G. B. B. M. Sutherland, and S. Krimm—1468(L)
Silver-activated alkali halides, H. W. Etzel and J. H. Schulman—1549
Sodium diffusion in sodium tungsten bronze, J. F. Smith and G. C. Danielson—266
Solid ozone, Callaway Brown, Abraham W. Berger, and Charles K. Hersh—1151(L)
Specific heats of single solids and moments of elastic frequency spectra, Jenn-Lin Hwang—154(L)
Structural investigation by means of nuclear magnetism. III. Ammonium halides, H. S. Gutowsky, G. E. Pake, and R. Bersohn—643
Structure for collagen, F. H. C. Crick—347(L)

Crystalline State (continued)
Structures of the boron hydrides, William N. Lipscomb—985
Studies on a group of silicon carbide structures, Richard S. Mitchell—1977
Successive orientational transitions in crystals, Theodore J. Krieger and Hubert M. James—796
Szilard-Chalmers reaction in crystalline compounds of chromium, Garman Harbottle—1083
Theoretical study of the colored alkali oxides, Inga Fischer-Hjalmars and Barbro Grabe—1259(L)
Theory of concentration quenching in inorganic phosphors, D. L. Dexter and James H. Schulman—1063
Theory of dielectric relaxation for a single-axis rotator in a crystalline field, John D. Hoffman and Heinz G. Pfeiffer—132
Theory of radioactive ion exchange, E. Pitts—56
Thermodynamics of boron nitride; low-temperature heat capacity and entropy; heats of combustion and formation, A. S. Dworkin, D. J. Sasmor, and E. R. Van Artsdalen—837
Thermodynamics of phase transitions in compressible solid lattices, O. K. Rice—1535
Thermoelectric power of pure and doped AgBr, Lyle Patrick and A. W. Lawson—1492
s-Triazine. I. The unit cell, L. A. Siegel and E. F. Williams—1147(L)
Vibrational spectra of molecules and complex ions in crystals VII. The raman spectrum of crystalline ammonia and 3-deutero-ammonia, F. P. Reding and D. F. Hornig—1926
Vibrational spectrum and the specific heat of germanium and silicon, Yü-Chang Hsieh—306

Detonation
Application of the Hertz theory of impact to explosion phenomena, M. P. Murgai—1687
Detonation properties of acetylene gas, R. E. Duff, H. T. Knight, and H. R. Wright—1618(L)
Diameter effect in condensed explosives. The relation between velocity and radius of curvature of the detonation wave, William W. Wood and John G. Kirkwood—1920
Equations of state and detonation theory, S. Paterson and J. M. Davidson—150(L)
Reaction zone in gaseous detonations, G. B. Kistiakowsky and Paul H. Kydd—1940(L)
Structure of a steady-state plane detonation wave with finite reaction rate, John G. Kirkwood and William W. Wood—1915

Deuterium (see **Isotopes**)

Dielectrics
Dielectric anomaly of ammonium sulfate at its transition temperature, Kan-Ichi Kaniyoshi and Toshihiko Miyamoto—756(L)
Dielectric behavior of methyl bromide in 3-cm region, Krishnaji and Prem Swarup—568(L)
Dielectric constant of supercritical steam, James K. Fogo, Sidney W. Benson, and Charles S. Copeland—209
Dielectric polarization in polar substances. Remark on a paper by F. E. Harris and B. J. Alder, H. Frohlich—1804
Dielectric properties of hydrogen halides. II. Hydrogen chloride, Richard W. Swenson and Robert H. Cole—284
Dielectric properties of some long-chain fatty acids and their methyl esters in the microwave region, T. J. Buchanan—578
Dielectric properties of wool-water systems at 3000 and 9300 megacycles, J. J. Windle and T. M. Shaw—1752
Effect of oxygen on the photoconductivity of anthracene. II, A. G. Chynoweth—1029
Electrically and elastically active relaxation modes, Y. Haven and J. H. van Santen—1146(L)
Electrical properties of some complex compounds. Part 1, P. E. Fielding—1153
Electrical properties of some complex compounds. Part 2, P. E. Fielding and D. P. Mellor—1155
Ellipsoidal molecular shape and dielectric relaxation-analysis, J. Ph. Poley—1466(L)
Experiments on polymer solution in inhomogeneous electrical fields, P. Debye, P. P. Debye, B. H. Eckstein, W. A. Barber, and G. J. Arquette—152(L)
Influence of a magnetic field on the microwave dielectric constant of a liquid crystal, E. F. Carr and R. D. Spence—1481
Influence of solvent upon the energy difference between rotational isomers, Akiyoshi Wada—198
Microwave absorption in the mixture (phenyl isothiocyanate+diethylamine), P. K. Kadaba—1465(L)
Onsager's theory of the dielectric constant of polar liquids, R. O. Davies and B. K. Scaife—148(L)
Photoconductivity of anthracene. I, A. G. Chynoweth and W. G. Schneider—1021
PVT relations of liquid carbon tetrachloride and *n*-perfluoroheptane and a test of the Clausius-Mosotti equation, B. J. Alder, E. W. Haycock, J. H. Hildebrand, and H. Watts—1060
Statistical mechanical derivation of Onsager's equation for dielectric polarization, Frank E. Harris and Berni J. Alder—1806
Theory of dielectric relaxation for a single-axis rotator in a crystalline field, John D. Hoffman and Heinz G. Pfeiffer—132
Theory of electromagnetophoresis. I. Magnetohydrodynamic forces experienced by spherical and symmetrically oriented cylindrical particles, Daniel Leenov and Alexander Kolin—683
Thermoelectric power of pure and doped AgBr, Lyle Patrick and A. W. Lawson—1492

Diffusion
Diffusion across an interface, P. L. Auer and E. W. Murbach—1054
Diffusion effects in the photochemistry of solid films, Joseph E. Wilson—334
Diffusion in CO_2–CH_4 mixtures to 225 atmospheres pressure, Q. R. Jeffries and H. G. Drickamer—436
Effect of compression and of hydrostatic pressure on the diffusion anistropy in zinc, T. Liu and H. G. Drickamer—312
Effect of compressive stress on self-diffusion in zinc, A. W. Lawson—1948(L)
Effect of pressure on diffusion in polymer solutions, A. H. Emer, Jr., L. H. Tung, and H. G. Drickamer—961
Flame turbulence measurements by the method of helium diffusion, Arthur A. Westenberg—814
Kinetics of the exchange processes in ion exchangers, Lennart W. Holm—1132(L)
Markoff random processes and the statistical mechanics of time-dependent phenomena. II. Irreversible processes in fluids, Medville S. Green—398
Note on the flow of gases through very fine tubes, G. W. Sears—1252
Photon-induced diffusion in thin films and single crystals of potassium iodide, C. J. Delbecq and P. H. Yuster—921
Sodium diffusion in sodium tungsten bronze, J. F. Smith and G. C. Danielson—266
Spectroscopic examination of the NH_3–HNO_3 and NH_3–NO_2 diffusion flames, Milton Farber and Alfred J. Darnell—1261(L)

Steady-state diffusion into a streaming sphere at low Reynolds number, H. L. Frisch—123
Surface migration of carbon on tungsten, Ralph Klein—1406
Transport properties of gases obeying a modified Buckingham (exp-six) potential, William E. Rice and Joseph O. Hirschfelder—187
Treatment of chemical kinetics with special applicability to diffusion controlled reactions, Richard M. Noyes—1349

Dipole Moment
Approximation of molecular orbitals in diatomic molecules by diatomic orbitals, Richard F. Wallis and Hugh M. Hulburt—774
Bond angle, dipole moment, and base strength, Julian H. Gibbs—1460(L)
Calculation of the distribution of relaxation times for a single-axis rotator using the random-jump hypothesis, John D. Hoffman—156(L)
Development of a quantum-mechanical model for the lithium fluoride molecule, G. C. Benson and B. M. E. van der Hoff—469
Dipole moments, nuclear quadrupole coupling, and the bonding orbitals in group V-trihalides, Paul Kisliuk—86
Far ultraviolet absorption spectra of the isomeric butenes, Julia T. Gary and Lucy W. Pickett—599
Hybridization and ionic character in the hydrogen chloride molecule, Paul N. Schatz—695
Ionicity of gaseous thallous chloride, Aubrey P. Altshuller—573(L)
Microwave spectra, structure, and dipole moment of stable pentaborane, Henry J. Hrostowski and Rollie J. Myers—262
Microwave spectrum and dipole moment of pyridine, Billy B. DeMore, W. S. Wilcox, and J. H. Goldstein—876
Microwave spectrum and properties of vinylene carbonate, Geo. R. Slayton, J. W. Simmons, and J. H. Goldstein—1678
Microwave spectrum and structure of benzonitrile, David R. Lide, Jr.—1577
Microwave spectrum of hydrogen peroxide, J. T. Massey and D. R. Bianco—442
Microwave spectrum of pyridine, Børge Bak, Lise Hansen, and John Rastrup-Anderson—565(L)
Relation of nuclear quadrupole couplings to the chemical bond, Walter Gordy—1470(L)
Stark effect in the microwave spectra of KCl and NaCl, P. A. Tate and M. W. P. Strandberg—1380
Temperature dependence of the molecular polarization of ammonia, Mikio Katayama—1473
Valence structure of the boron hydrides, W. H. Eberhardt, Bryce Crawford, Jr., and William N. Lipscomb—989
Vibrational intensities in diatomic infrared transitions. The vibrational matrix elements for CO, Robert C. Herman and Kurt E. Skuler—481

Elasticity
Elastic constants of AgBr at 28°C, D. S. Tannhauser, and A. W. Lawson—2092(L)
Elastic constants of gels, M. Krishnamurthi and G. Sivarama Sastry—1133(L)

Electrochemistry
Calculation of the concentration of atomic hydrogen at a cathode. II, J. O'M. Bockris and Roger Parsons—1774(L)
Calculation of the concentration of atomic hydrogen at a cathode. II, Hugh W. Salzberg and Sigmund Schuldiner—1774(L)
Concentration dependence of differential capacity in electrolytes at the electrocapillarity maximum, J. Ross Macdonald—763(L)
Exact solution of the Debye-Hückel equations for a polarized electrode, J. Ross Macdonald and Malcolm K. Brachman—1314
Ionic components of charge in the electrical double layer, David C. Grahame and Barbara A. Soderberg—449
Onsager thermodynamics of galvanic cells with liquid-liquid junctions, Richard J. Bearman—585
Photochemical reactions of cyclooctatetraene, Ikuzo Tanaka and Michio Okuda—1780(L)
Reduction of carbon dioxide on mercury cathodes, Truman E. Teeter and Pierre Van Rysselberghe—759(L)
Static space-charge effects in the diffuse double layer, J. Ross Macdonald—1317
Theory of the differential capacitance of the double layer in unadsorbed electrolytes, James Ross Macdonald—1857

Electron Affinity
Electron affinity of fluorine, John L. Margrave—636
Electronegativities and some electron affinities of copper, zinc, and gallium subgroup elements, Aubrey P. Altshuller—765(L)
Extrapolation methods for electron affinities, John L. Margrave—1937(L)
Extrapolation of electron affinities, H. O. Pritchard and H. A. Skinner—1936(L)
Mass spectrometric study of the molecular sublimation of graphite, Richard E. Homig—126

Electron Diffraction
Electron scattering and internal rotation, J. Karle—1246
Molecular structure of 1,1,2,2,-tetrafluorodichloroethane, M. Iwasaki, S. Nagase, and R. Kojima—959(L)
Structure and internal motion of hexachloroethane, D. A. Swick, I. L. Karle, and J. Karle—1242
Structure of the monomer of formic acid, I. L. Karle and J. Karle—43

Electron Microscopy

Emission Spectra
Continuous radiation from the rare gases in the vacuum ultraviolet, Carl Kenty—1466(L)
Decomposition of CF_4 in flames, D. E. Mann, H. P. Broida, and B. E. Squires—348(L)
Emission bands of NO in the vacuum ultraviolet region excited in the NO-afterglow, Yoshio Tanaka—2045
Emission spectrum attributed to acetaldehyde, G. Wilse Robinson—1147(L)
Inter- and intramolecular energy transfer processes. 3. Phosphorescence bands of some carcinogenic aromatic hydrocarbons, Margaret M. Moodie and C. Reid—252
Silver-activated alkali halides, H. W. Etzel and J. H. Schulman—1549
Techniques in the study of emission spectra of polyatomic molecules—The spectra of benzaldehyde and acetophenone, G. Wilse Robinson—1384
λ4050 group of cometary spectra in the acetylene-oxygen flame, Norman H. Kiess and Arnold M. Bass—569(L)

Energy Transfer
Influence of permanent multipole interactions on vibrational deactivation in molecular collisions, F. W. de Wette and Z. I. Slawsky—1620(L)
Inter- and intramolecular energy transfer processes. 3. Phosphorescence bands of some carcinogenic aromatic hydrocarbons, Margaret M. Moodie and C. Reid—252
Inter- and intramolecular energy transfer processes. 4. Hydrogen-hydrocarbon systems, Margaret M. Moodie and C. Reid—1126
Rotational energy transfer in diatomic molecules, Robert Brout—1189
Rotational energy transfer in H_2, Robert Brout—934

Energy Transfer (continued)
Theory of concentration quenching in inorganic phosphors, D. L. Dexter and James H. Schulman—1063
Thermal relaxation in gases, Robert Brout—1500
Equation of State
Equations of state and detonation theory, S. Paterson and J. M. Davidson—150(L)
Further results on Monte Carlo equations of state, Marshall N. Rosenbluth and Arianna W. Rosenbluth—881
High temperature equation of state by a perturbation method. I. Nonpolar gases, Robert W. Zwanzig—1420
Imperfect gas as an association problem, William Weltner, Jr.—153(L)
Intermolecular potentials for some simple nonpolar molecules, Edward A. Mason and William E. Rice—843
Intermolecular potentials of helium and hydrogen, Edward A. Mason and William E. Rice—522
PVT relations of liquid carbon tetrachloride and *n*-perfluoroheptane and a test of the Clausius-Mosotti equation, B. J. Alder, E. W. Haycock, J. H. Hildebrand, and H. Watts—1060
Second virial coefficients of gases obeying a modified Buckingham (exp-six) potential, William E. Rice and Joseph O. Hirschfelder—187
Third virial coefficient of a Lennard-Jones gas by Kihara's method with tables for the 6-9 potential, Leo F. Epstein, Celesta J. Hibbert, Marion D. Powers, and Glenn M. Roe—464
Errata
Errata and addenda: Theory of dielectric relaxation for a single-axis rotator in a crystalline field, John D. Hoffman—1144(L)
Errata: Free-electron network model for conjugated systems, I, II, and IV, Klaus Ruedenberg and Charles W. Scherr—151(L)
Errata: High temperature equation of state by a perturbation method. I. Nonpolar gases, Robert W. Zwanzig—2099(L)
Errata: Intrinsic viscosities and diffusion constants of flexible macromolecules in solution, John G. Kirkwood and Jacob Riseman—1626(L)
Errata: Mechanism of the Hg($^3P_1$) photosensitized decomposition of ethylene, A. G. Mitchell and D. J. LeRoy—573(L)
Errata: Primary photochemical process in bromine, G. B. Kistiakowsky and James C. Sternberg—1949(L)
Errata: Radial distribution functions and the equation of state of monatomic fluids, Robert W. Zwanzig, John G. Kirkwood, Kenneth F. Stripp, and Irwin Oppenheim—1625(L)
Errata: Separation and concentration of proteins in a pH field combined with an electric field, Alexander Kolin—2099(L)
Errata: Study of two-center integrals useful in calculations on molecular structure. I, II, C. C. J. Roothaan and Klaus Ruedenberg—765(L)
Errata: Symmetry and stability in diborane and in borine, G. W. Castellan—1791(L)
Errata: Temperature independent factor in the relative rates of isotopic three center reactions, Jacob Bigeleisen and Max Wolfsberg—1264(L)
Erratum: Absorption of 3.3-cm microwaves in chloroform and ethylene dichloride in the liquid state, S. C. Sirkar and D. K. Ghosh—350(L)
Erratum: Author index to volume 21—958(L)
Erratum: Concentration dependence of differential capacity in electrolytes at the electrocapillarity maximum, J. Ross Macdonald—1471(L)
Erratum: Flame zone studies by the particle track technique. I. Apparatus and technique, R. M. Fristrom, W. H. Avery, R. Prescott, and A. Mattuck—1145(L)
Erratum: Heats of combustion and formation of some organosilicon compounds, Toshio Tanaka, Ukilo Takahashi, Rokuor Okawara, and Takeo Watase—957(L)
Erratum: Infrared spectrum and molecular constants of sulfur dioxide, R. D. Shelton, A. H. Nielsen, and W. H. Fletcher—1791(L)
Erratum: Intensities of vibration-rotation bands, Robert C. Herman and Kurt E. Shuler—954(L)
Erratum: Magnetic susceptibilities of Np^{+6}, Np^{+5}, and Np^{+4}, Dieter M. Gruen and Clyde A. Hutchison, Jr.—960(L)
Erratum: A note on the kinetics of unitary processes, Stuart A. Rice—765(L)
Erratum: Relation between critical temperature and pressure of normal paraffins, Yatendra Pal Varshni—150(L)
Erratum: Relation between vapour pressure and viscosity of liquids, Shashanka Shekhar Mitra—1471(L)
Erratum: Rotational energy transfer in diatomic molecules, Robert Brout—1791(L)
Erratum: Studies by infrared spectra on the initiation process in autoxidation of methyl-linolenate, N. A. Khan—764(L)
Erratum: Surface migration of carbon on tungsten, Ralph Klein—1952(L)
Erratum: Theory of absorption spectra of carotenoids, Gentaro Araki—573(L)

Faraday Effect
Anomalous Faraday effect in aqueous solutions of inorganic salts, D. D. Randall and A. M. Taylor—1149(L)
Flames
Combustion wave stability and flammability limits, J. B. Rosen—750(L)
Composition profiles in pre-mixed laminar flames, Rochelle Prescott, R. L. Hudson, S. N. Foner, and W. H. Avery—145(L)
Effects of temperature gradients, self-absorption, and line shape on apparent rotational temperatures of OH, B. H. Elliott and S. S. Penner—101
Flame turbulence measurements by the method of helium diffusion, Arthur A. Westenberg—814
Flame zone studies by the particle track technique. I. Apparatus and technique, R. M. Fristrom, W. H. Avery, R. Prescott, and A. Mattuck—106
Flat flames of ammonia in air, N. W. Luft and L. Cohen—348(L)
Improved approximate solutions of flame equations for flames governed by simple chemical reactions, Kenneth A. Wilde—1788(L)
Isolation of HO_2 from the hydrogen, oxygen diffusion flame, J. D. McKinley, Jr.—1258(L)
Measurement of temperature distribution in a low-pressure flat flame, Raymond Friedman and Edward Burke—824
Microwave investigation of the ionization of hydrogen-oxygen and acetylene-oxygen flames, Kurt E. Shuler and Joseph Weber—491
Precombustion reactions in hydrocarbon diffusion flames: The paraffin candle flame, S. Ruven Smith and Alvin S. Gordon—1150(L)
Spectroscopic examination of the NH_3—HNO_3 and NH_3—NO_2 diffusion flames, Milton Farber and Alfred J. Darnell—1261(L)
Stability and structure of Bunsen flame, Mahinder S. Uberoi—1784(L)
Theory of laminar flame stability. I. Analytic stability condition, J. B. Rosen—733

Theory of laminar flame stability. II. General numerical method and application to typical system, J. B. Rosen—743
Theory of linear flame propagation. Part I. Existence, uniqueness, and stability of the steady state, David Layzer—222
Theory of linear flame propagation. Part II. Structure of the steady state, David Layzer—229
Theory of the spherical diffusion flame: The effect of atmosphere depletion, Felix T. Smith—1605
λ4050 group of cometary spectra in the acetylene-oxygen flame, Norman H. Kiess and Arnold M. Bass—569(L)

Fluorescence
Configuration coordinate model for luminescence in KCl: Tl, Peter D. Johnson—1143(L)
Decomposition in liquid scintillation systems, C. Redi—1947(L)
Decomposition of CF_4 in flames, D. E. Mann, H. P. Broida, and B. E. Squires—348(L)
Excited states of the naphthalene molecule. I. Symmetry properties of the first two excited singlet states, Donald S. McClure—1668
Fluorescence and thermoluminescence of ice, Leonard I. Grossweiner and Max S. Matheson—1514
Fluorescence of biacetyl vapor at 4358A, Nathan A. Coward and W. Albert Noyes, Jr.—1207
Fluorescence of nitrogen dioxide, Dan Neuberger and A. B. F. Duncan—1693
Fluorescence spectrum of triphenylmethyl at 4°K, S. I. Weissman—155(L)
Origin of the fluorescence in self-activated ZnS, CdS, and ZnO, F. A. Kröger and H. J. Vink—250
Polarization of π-electron transitions in aromatic molecules, D. S. McClure—1256(L)
Radiation chemistry of luminescent solutions, Milton Burton and W. N. Patrick—1150(L)
Supposed Raman spectrum of gaseous bromine, R. F. Barrow—1775(L)
Symmetry classification of the energy levels of some triarylmethyl free radicals and their cations, Ting Li Chu and S. I. Weissman—21
Treatment of chemical kinetics with special applicability to diffusion controlled reactions, Richard M. Noyes—1349

Free Rotation (see **Rotational Isomerism**)

Heat Capacity (see **Thermodynamic Properties**)

High Pressures
Diffusion in $CO_2 - CH_4$ mixtures to 225 atmospheres pressure, Q. R. Jeffries and H. G. Drickamer—436
Effect of compression and of hydrostatic pressure on the diffusion anisotropy in zinc, T. Liu and H. G. Drickamer—312
Effect of compressive stress on self-diffusion in zinc, A. W. Lawson—1948(L)
Effect of pressure on thermal diffusion in *n*-paraffin hydrocarbon-CS_2 mixtures, W. M. Rutherford and H. G. Drickamer—1284
Nuclear magnetic resonance in liquids under high pressure, G. B. Benedek and E. M. Purcell—2003
Theory of thermal diffusion in liquids and the use of pressure to investigate the theory, W. M. Rutherford and H. G. Drickamer—1157

Hindered Rotation (see **Rotation**)

Infrared Spectra (see **Absorption Spectra**)

Intensities of Spectra
Absorption intensities of the isomeric pentenes in the vacuum ultraviolet, Dorothy Semenow, Anna J. Harrison, and Emma F. Carr—638
Infrared study of the effect of solvent upon ν(NH) in pyrrole. Marie-Louise Josien and N. Fusan—1169
Intensities of the infrared bands of carbon suboxide, R. L. Williams—345(L)
Intensity of the bending mode in carbonyl sulphide, Edward C. Wingfield and Joseph W. Straley—1949(L)
Temperature dependence of the ultraviolet absorption spectrum of naphthalene in solution, Riccardo Passerini and Ian G. Ross—1012
Vibrational intensities in diatomic infrared transitions. The vibrational matrix elements for CO, Robert C. Herman and Kurt E. Shuler—481

Isotopes
Altered proportions of isotopes of molecular nitrogen as evidence for a monomolecular reaction, M. Walser, J. George, and L. J. Bodenlos—1146(L)
Effect of compression and of hydrostatic pressure on the diffusion anisotropy in zinc, T. Liu and H. G. Drickamer—312
Exchange reaction between iodine and methyl iodide, H. Behrens and Alfred G. Maddock—1139(L)
Fractionation of oxygen isotopes during the formation of metal oxide films, Malcolm Dole and G. A. Lane—949(L)
Homomolecular exchange of nitrogen in a glow discharge, W. H. Johnston and R. M. Anstett—146(L)
Isotopic exchange of oxygen in the systems water-silica and oxygen-silica, Dwight A. Hutchison—758(L)
Kinetics of isotope-exchange reactions of fluorine with some halogen fluorides, Richard M. Adams, Richard B. Bernstein, and Joseph J. Katz—13
Nonequivalence of chlorine atoms in phosphorus pentachloride, James Downs and Rowland E. Johnson—143(L)
Nuclear spin quantum number of Si^{29} isotope, Richard A. Ogg, Jr., and James D. Ray—147(L)
Photolysis of mixtures of acetone-d_6 and diethyl ketone, M. H. J. Wijnen—1631(L)
Relative abundance of HT and HTO in the atmosphere, P. Harteck—1746
Theory of radioactive ion exchange, E. Pitts—56

Isotope Effects
Calculation of equilibrium constants for several exchange reactions of nitrogen-15 between oxy compounds of nitrogen, W. Spindel—1271(L)
Carbon-13 isotope effect in the thermodecomposition of nickel carbonyl, Richard B. Bernstein—710
Deuterium effect on hydrogen bond distances in hafnium dihydride, S. S. Sidhu—1062
Effect of ring substituents on the isotope effects in reactions of carbonyl-C^{14} esters and ketones, Gus A. Ropp and Vernon F. Raaen—1223
Fractionation of oxygen isotopes during the formation of metal oxide films, Malcolm Dole and G. A. Lane—949(L)
High speed machine computation of ideal gas thermodynamic functions. I. The isotopic water molecules, Abraham S. Friedman and Lester Haar—2051
Infrared absorption spectra of aqueous HF_2^-, DF_2^-, and HF, Llewellyn H. Jones and Robert A. Penneman—781
Infrared spectra of CH_3COONa and CD_3COONa and assignments of vibrational frequencies, Llewellyn H. Jones and Eugene McLaren—1796
Infrared spectra of monochlorogermane and monochlorogermane-d_3, R. C. Lord and C. M. Steese—542
Infrared spectrum and molecular constants of $C^{14}O_2$, Alvin H. Nielsen and Robert T. Lagamann—36
Infrared spectrum and molecular constants of DBr, Fred L. Keller and Alvin H. Nielsen—294

Isotope Effects (continued)
Infrared spectrum of σ_2 for $B^{10}F_3$ and $B^{11}F_3$, Alvin H. Nielsen—659
Infrared spectrum of $S^{16}O^{18}O$ and the potential constants of SO_2, Santiago R. Polo and M. Kent Wilson—900
Isotope effect in continuous ultraviolet absorption spectra: Methyl bromide-d_3 and chloroform-d, Adon A. Gordus and Richard B. Bernstein—790
Librational heat capacity of ice and of heavy ice, R. W. Blue—280
Method of determining the dissociation energy of nitrogen, W. F. Sheehan, Jr.—1461(L)
Microwave spectrum of formic acid, Ralph Trambarulo and Paul M. Moser—1622(L)
Microwave spectrum of hydrogen peroxide, J. T. Massey and D. R. Bianco—442
N^{15} isotope shift of the perpendicular bending frequency in KNO_3 and $NaNO_3$, J. C. Decius—1941(L)
Near infrared spectrum and the internuclear distances of nitrous oxide, A. E. Douglas and C. K. Møller—275
Rates of formation of different deuteroethylenes and deuteroethanes in the reaction of ethylene and deuterium, Tominaga Keii—144(L)
Rotational constants of GeH_3D and $GeHD_3$, Louis P. Lindeman and M. Kent Wilson—1723
Rotational constants of SiH_3D, Santiago R. Polo and M. Kent Wilson—1559
Substituted methanes. XVIII. Vibrational spectra of $C^{13}H_3I$, Richard B. Bernstein, Forrest F. Cleveland, and Fred L. Voelz—193
Vibrational spectra of trifluoroethylene and trifluoroethylene-d_1, D. E. Mann, N. Acquista, and Earle K. Plyler—1586

Kinetics of Reaction
Activation energy of the $H + H_2$ reaction, Virginia Griffing and Joseph T. Vanderslice—1142(L)
Adequacy of the born approximation in the calculation of chemical reaction rates: a reply to Yasumori and Sato, Sidney Golden—1938(L)
Altered proportions of isotopes of molecular nitrogen as evidence for a monomolecular reaction, M. Walser, J. George, and L. J. Bodenlos—1146(L)
Application of the Hertz theory of impact to explosion phenomena, M. P. Murgai—1687
Bromination of hydrocarbons. VII. Bromination of isobutane. Bond dissociation energies from bromination kinetics, Bernard H. Eckstein, Harold A. Scheraga, and Ervin R. Van Artsdalen—28
Carbon-13 isotope effect in the thermodecomposition of nickel carbonyl, Richard B. Bernstein—710
Carbon-carbon bond dissociation energies in the cycloalkanes, Frank H. Seubold, Jr.—945(L)
C—C bond dissociation energies in cyclanes, H. O. Pritchard and A. F. Trotman-Dickenson—944(L)
Chemical kinetics and equilibrium. The law of integral powers in kinetics, J. A. Christiansen—1612(L)
Chemical synthesis from free radicals produced in microwave fields, R. L. McCarthy—1360
Composition profiles in pre-mixed laminar flames, Rochelle Prescott, R. L. Hudson, S. N. Foner, and W. H. Avery—145(L)
Conversion of *ortho-* to *para*-hydrogen in the liquid phase, G. L. Squires and A. T. Stewart—754(L)
Decomposition in liquid scintillation systems, C. Redi—1947(L)
Decomposition of methane in low-pressure glow discharge, Milton Burton and J. P. Manion—2095(L)
Decomposition of methanol induced by methoxy radicals, Yoshimasa Takezaki and Chisato Takeuchi—1527
Decomposition of nitrogen dioxide by neutron irradiation, P. Harteck and S. Dondes—953(L)
Determination of some carbon-chlorine bond dissociation energies, M. Szwarc and J. Watson Taylor—270
Diffusion effects in the photochemistry of solid films, Joseph H. Wilson—334
Effect of oxygen on the photoconductivity of anthracene. II, A. G. Chynoweth—1029
Effect of ring substituents on the isotope effects in reactions of carbonyl-C^{14} esters and ketones, Gus A. Ropp and Vernon F. Raaen—1223
Equilibrium theory of unimolecular reactions, J. Calvin Giddings and Henry Eyring—538
Exchange reaction between iodine and methyl iodide, H. Behrens and Alfred G. Maddock—1139(L)
Flat flames of ammonia in air, N. W. Luft and L. Cohen—348(L)
Free radicals by mass spectrometery, V. The ionization potentials of methyl, allyl, and benzyl radicals, F. P. Lossing, K. U. Ingold, and I. H. S. Henderson—621
Further studies on the reaction of cyclopentane with mercury-6 ($^3P_1$) atoms, P. W. Beck, D. V. Kniebes, and H. E. Gunning—678
Heterogeneous nucleation of crystals from vapor, G. M. Pound, M. T. Simnad, and Ling Yang—1215
Homogeneous activation of molecular hydrogen by cupric acetate, J. Halpern and R. G. Dakers—1272(L)
Homomolecular exchange of nitrogen in a glow discharge, W. H. Johnston and R. M. Anstett—146(L)
Improved approximate solutions of flame equations for flames governed by simple chemical reactions, Kenneth A. Wilde—1788(L)
Infrared spectrum of disilane, H. S. Gutowsky and E. O. Stejskal—939
Infrared study of the $BF_3 - BCl_3$ reaction, R. E. Nightingale and Bryce Crawford, Jr.—1468(L)
Initiation processes in the autoxidation of fatty acid esters and allied substances, N. A. Khan—2090(L)
Ion-exchange and adsorption column kinetics with uniform partial presaturation, Theodore Vermeulen and Nevin K. Hiester—96
Ion-pair yield of the tritium-oxygen reaction, Leon M. Dorfman and B. A. Hemmer—1555
Isotopic exchange of oxygen in the systems water-silica and oxygen-silica, Dwight A. Hutchison—758(L)
Kinetics of isotope-exchange reactions of fluorine with some halogen fluorides, Richard M. Adams, Richard B. Bernstein, and Joseph J. Katz—13
Kinetics of oxidation of ammonia by nitric oxide, Henry Wise and Maurice F. Frech—1463(L)
Kinetics of the exchange processes in ion exchangers, Lennart W. Holm—1132(L)
Kinetics of the fast gas phase reaction between ozone and nitric oxide, Harold S. Johnston and Harvey J. Crosby—689
Kinetics of the reaction of ethyl bromomalonate with thiosulfate, Wilson J. Broach and Edward S. Amis—39
Kinetics of the reaction of sodium bromomalonate with thiosulfate, Edward S. Amis and Wilson J. Broach—952(L)
Mass spectrometric detection of free OH radical in the thermal decomposition products of H_2O vapor, T. Tsuchiya—1784(L)
Matrix isolation method for the experimental study of unstable species, Eric Whittle, David A. Dows, and George C. Pimentel—1943(L)
Measurement of temperature distribution in a low-pressure flat flame, Raymond Friedman and Edward Burke—824

Mechanism of formation of the quinonoid hydrocarbon $CH_2:C_6H_4:CH_2$, M. Levy, M. Szwarc, and J. Throssell—1904
Method of determining the dissociation energy of nitrogen, W. F. Sheehan, Jr.—1461(L)
Methyl affinities of aromatic compounds, M. Levy and M. Szwarc—1621(L)
Modified transition state theory of reaction rates, F. A. Matsen—165
Molecular orbital theory of orientation in aromatic, heteroaromatic, and other conjugated molecules, Kenichi Fukui, Teijiro Yonezawa, Chikayoshi Nagata, and Haruo Shingu—1433
Network theory of the gel point and the "incestuous" polymerization of diellyl phthalate, Manfred Gordon—610
Nonequivalence of chlorine atoms in phosphorus pentachloride, James Downs and Rowland E. Johnson—143(L)
Oxidation of nitrogen by ozone to form nitrous oxide, P. Harteck and S. Dondes—758(L)
Photobleaching and photorecovery of dyes, Gerald Oster and Neil Wotherspoon—157(L)
Photochemical reactions of cyclooctatetraene, Ikuzo Tanaka and Michio Okuda—1780(L)
Photolysis of ammonia at 1849A in a flow system, C. C. McDonald, A. Kahn, and H. E. Gunning—908
Photolysis of methyl bromide in the presence of mercury, Charles F. Boynton, Jr., and H. Austin Taylor—1929
Photolysis of mixtures of acetone-d_6 and diethyl ketone, M. H. J. Wijnen—1631(L)
Polarization effects in the ionic conductivity of silver bromide, Robert J. Friauf—1329
Precombustion reactions in hydrocarbon diffusion flames: The paraffin candle flame, S. Ruven Smith and Alvin S. Gordon—1150(L)
Quantum-mechanical equation of reaction rates, Iwao Yasumori and Kenji Fueki—1790(L)
Radiation-induced reaction between iodine and heptane, Paul F. Forsyth, Edward N. Weber, and Robert H. Schuler—66
Radical pair yield of ionizing radiation in sulfuric acid solution, Everett R. Johnson and Jerome Weiss—752(L)
Rate constant of the reaction between hydrogen peroxide and ferrous ions, Tyson Rigg, William Taylor, and Joseph Weiss—575
Rates of formation of different deuteroethylenes and deuteroethanes in the reaction of ethylene and deuterium, Tominaga Keii—144(L)
Reaction between fluorine and chlorine dioxide, a homogeneous, bimolecular reaction, P. J. Aymonino, J. E. Sicre, and H. J. Schumacher—756(L)
Reaction of cyclohexane with mercury-6 ($^3P_1$) atoms, P. W. Beck, D. V. Kniebes, and H. E. Gunning—672
Reaction of methyl radicals with aceto- and propio-nitrile, M. H. J. Wijnen—1074
Reaction velocity near equilibrium, Pierre Van Rysselberghe—761(L)
Reaction zone in gaseous detonations, G. B. Kistiakowsky and Paul H. Kydd—1940(L)
Reactions of free radicals with aldehydes. II. The reactions of methyl radicals with propionaldehyde, David H. Volman and Robert K. Brinton—929
Reduction of SrO by methane, George E. Moore, H. W. Allison, and K. B. Wolfstirn—726
Relation between the chemical reactivity and energy levels of the chemical reagent, S. Nagakura and J. Tanaka—563(L)
Relative abundance of HT and HTO in the atmosphere, P. Harteck—1746
Remarks to Golden's rate theory, Iwao Yasumori and Shin Sato—1938(L)
Reply to Christiansen's letter, 'chemical kinetics and equilibrium,' Milton Manes, L. J. E. Hofer, and Sol Weller—1612(L)
Reply to Khan's letter, "Initiation processes in the autoxidation of fatty acid esters and allied substances," L. Bateman—2090(L)
Scavenger effect in the n,γ reaction in carbon tetrachloride, William H. Hamill and Russell R. Williams, Jr.—53
Stabilization of free radicals from the decomposition of hydrazoic acid, I. L. Mador and M. C. Williams—1627(L)
Statistical interpretations of unimolecular reaction rates, Harold S. Johnston and James R. White—1969
Studies of evaporation of small drops, Louis Monchick and Howard Reiss—831
Temperature gradients in reacting systems, Sidney W. Benson—46
Theory of ignition considered as a thermal reaction, Bruce L. Hicks—414
Theory of radioactive ion exchange, E. Pitts—56
Time effect in the fracture of glass from the standpoint of nucleation theory, Takeo Yokobori—951(L)
Treatment of chemical kinetics with special applicability to diffusion controlled reactions, Richard M. Noyes—1349
Vacuum ultraviolet photochemistry, Part I. Nitrous oxide at 1470A, Murray Zelikoff and Leonard M. Aschenbrand—1680
Vacuum ultraviolet photochemistry, Part II. Nitrous oxide at 1849A, Murray Zelikoff and Leonard M. Aschenbrand—1685

Large Molecules (see **Polymers**)
Light Scattering
Absolute turbidity of water, Richard W. Fessenden and Richard S. Stein—1778(L)
Experimental verification of the Mie theory of light scattering, Wilfried Heller, Joseph N. Epel, and Richard M. Tabibian—1777(L)
Light scattering by tobacco mosaic virus nucleic acid, Theodore G. Northrop and Robert L. Sinsheimer—703
Light scattering determination of the absolute turbidity of water, D. A. I. Goring and P. G. Napier—147(L)
Light scattering of spherical colloidal particles, Wilfried Heller and William J. Pangonis—948(L)
Liquids
Absolute turbidity of water, Richard W. Fessenden and Richard S. Stein—1778(L)
Activation energy for viscous flow and Sutherland's constant, C. J. G. Raw—1946(L)
Approximate treatment of the viscosity of idealized liquids. I. The collisional contribution, F. C. Collins and H. Raffel—1728
Calculation of the free volumes of liquids from measurements of sonic velocity, F. C. Collins and M. H. Navidi—1254(L)
Conversion of *ortho-* to *para*-hydrogen in the liquid phase, G. L. Squires and A. T. Stewart—754(L)
Critical phenomena in the cyclohexane-aniline system, Douglas Atack and O. K. Rice—382
Critical point and the phase rule, Johan van Dranen—1265(L)
Critical temperature and boiling point of normal paraffins, Shashanka Shekhar Mitra—156(L)
Addendum: Critical temperature and pressure of normal paraffins, Yatendra Pal Varshni—1629(L)
Critical temperature and pressure of *n*-paraffins, L. Grunberg—157(L)

Liquids (continued)
Critical temperatures of normal paraffins, Y. P. Varshni and S. N. Srivastava—349(L)
Decomposition in liquid scintillation systems, C. Redi—1947(L)
Dependence of surface tension on temperature, Shashanka Shekhar Mitra—1134(L)
Determination of concentrations in the ultracentrifugation of two-component systems, R. Trautman, V. N. Schumaker, W. F. Harrington, and H. K. Schachman—555
Deviations from additivity of the intermolecular field at high densities, Laurens Jansen and Zaka I. Slawsky—1701
Dielectric properties of some long-chain fatty acids and their methyl esters in the microwave region, T. J. Buchanan—578
Diffusion across an interface, P. L. Auer and E. W. Murbach—1054
Effect of pressure on thermal diffusion in *n*-paraffin hydrocarbon-CS_2 mixtures, W. M. Rutherford and H. G. Drickamer—1284
Experiments on polymer solution in inhomogeneous electrical fields, P. Debye, P. P. Debye, B. H. Eckstein, W. A. Barber, and G. J. Arquette—152(L)
Explanation of certain types of curves found in high-frequency techniques, H. W. Hamme, E. L. Grove, and J. L. Kassner—944(L)
Generalization of the radial dilution square law in ultracentrifugation, Rodes Trautman and Verne Schumaker—551
Influence of a magnetic field on the microwave dielectric constant of a liquid crystal, E. F. Carr and R. D. Spence—1481
Infrared and Raman spectra of 1,1-dimethylhydrazine and trimethylhydrazine, E. R. Shull, J. L. Wood, J. G. Aston, and D. H. Rank—1191
Inter- and intramolecular energy transfer processes. 4. Hydrogen-hydrocarbon systems, Margaret M. Moodie and C. Reid—1126
Investigations of the "vapor snake" phenomenon, R. Verschingel and H. I. Schiff—723
Light scattering determination of the absolute turbidity of water, D. A. I. Goring and P. G. Napier—147(L)
Liquid system ozone-oxygen, A. C. Jenkins and C. M. Birdsall—1779(L)
Navier-Stokes' equations for non-Newtonian liquids, Ali A. K. Ibrahim—1274(L)
Neutron diffraction study of liquid mercury, George H. Vineyard—1665
Nuclear magnetic resonance in liquids under high pressure, G. B. Benedek and E. M. Purcell—2003
Nuclear relaxation and quasi-crystalline structure of liquids, L. Giulotto, G. Chiarotti, and G. Cristiani—1143(L)
Onsager's theory of the dielectric constant of polar liquids, R. O. Davies and B. K. Scaife—148(L)
Partial molal volumes of hydrocarbons in water solution, W. L. Masterton—1830
N-particle distribution functions, H. L. Frisch—1713
Proton magnetic resonance spectrum of ammonia, and the interaction involved in hydrogen bond association, Richard A. Ogg, Jr.—560
PVT relations of liquid carbon tetrachloride and *n*-perfluoroheptane and a test of the Clausius-Mosotti equation, B. J. Alder, E. W. Haycock, J. H. Hildebrand, and H. Watts—1060
Raman frequency of liquid bromine, H. Stammreich and Roberto Forneris—1624(L)
Raman spectra and potential constants for CF_3CL, CF_3Br, and CF_3I, Robert Cooper Taylor—714
Rectilinear diameter law of mole fractions for binary liquid-vapor coexistence regions near the critical locus, Sidney W. Benson, Peter E. M. Allen, and Charles S. Copeland—247
Relation between the activation energy for viscous flow and the Lennard-Jones (12,6) potential parameter, ϵ/κ, C. J. G. Raw—1627(L)
Relation between vapor pressure and viscosity of liquids, Shashanka Shekhar Mitra—349(L)
Schlieren studies of the critical region, Howard B. Palmer—625
Statistical mechanical theory of transport processes. VII. The coefficient of thermal conductivity of monatomic liquids, Robert W. Zwanzig, John G. Kirkwood, Irwin Oppenheim, and Berni J. Alder—783
Studies of evaporation of small drops, Louis Monchick and Howard Reiss—831
Theory of electromagnetophoresis. I. Magnetohydrodynamic forces experienced by spherical and symmetrically oriented cylindrical particles, Daniel Leenov and Alexander Kolin—683
Theory of thermal diffusion in liquids and the use of pressure to investigate the theory, W. M. Rutherford and H. G. Drickamer—1157
Thermal diffusion in binary liquid mixtures of molecules of simple symmetry, R. L. Saxton, E. L. Dougherty, and H. G. Drickamer—1166
Thermal diffusion in binary mixtures of CS_2 and hexane isomers, W. M. Rutherford, E. L. Dougherty, and H. G. Drickamer—1289
Thermal diffusion in mixtures of tetrachloroethane with normal paraffin hydrocarbons, R. L. Saxton and H. G. Drickamer—1287
Thermal diffusion in the liquid phase, J. Jenner and G. Thomaes—566(L)
Vapor pressure and viscosity of liquids, Shashanka Shekhar Mitra and Dhirendra Nath Chakravarty—1775(L)
Vapor pressure of uranium, Everett G. Rauh and Robert J. Thorn—1414
Velocity of one megacycle ultrasonic waves in benzene and toluene solutions of polystyrene, William M. Fox and George W. Hazzard—1485
Velocity of sound in hydrazine-water mixtures at 500 kilocycles, George G. Kretschmar—753(L)
Velocity of sound in water as a function of temperature and pressure, A. H. Smith and A. W. Lawson—351

Magnetic Resonance
Electron distribution in molecules. IV. Phosphorus magnetic resonance shifts, H. S. Gutowsky and D. W. McCall—162
Hyperfine splittings in polyatomic free radicals, S. I. Weissman—1378
Ionization of strong electrolytes. III. Proton magnetic resonance in nitric, perchloric, and hydrochloric acids, G. C. Hood, O. Redlich, and C. A. Reilly—2067
Note on the fluorine resonance shifts, A. Saika and C. P. Slichter—26
Nuclear magnetic resonance in liquids under high pressure, G. B. Benedek and E. M. Purcell—2003
Nuclear relaxation and quasi-crystalline structure of borohydride ion and diborane, Richard A. Ogg, Jr.—1933
Nuclear relaxation and quasi-crystalline structure of liquids, L. Giulotto, G. Chiarotti, and G. Cristiani—1143(L)
Nuclear spin quantum number of Si^{29} isotope, Richard A. Ogg, Jr. and James D. Ray—147(L)
Paramagnetic resonance absorption in triphenylmethyl and dimesitylmethyl, H. S. Jarrett and G. J. Sloan—1783(L)

Paramagnetic resonance absorption of violanthrone and violanthrene, Y. Yokozawa and I. Tatsuzki—2087(L)
Paramagnetic resonance in phthalocyanine, chlorophyll, and haemoglobin derivatives, D. J. E. Ingram and J. E. Bennett—1136(L)
Paramagnetic resonance spectra of Wurster's free radical ions, S. I. Weissman—1135(L)
Proton magnetic resonance and structure of ammonium hydroxide, H. S. Gutowsky and S. Fujiwara—1782(L)
Proton magnetic resonance in an ammonium chloride single crystal, R. Bersohn and H. S. Gutowsky—651
Proton magnetic resonance spectrum of ammonia, and the interaction involved in hydrogen bond association, Richard A. Ogg, Jr.—560
Proton relaxation in Mn^{++} aqueous solutions, John R. Zimmerman—950(L)
Rotation in solid mixtures of neohexane and cyclopentane from 20°K to their melting points, J. G. Aston, Bouwe Bolger, Ralph Trambarulo, and H. Segall—460
Structural investigation by means of nuclear magnetism. III. Ammonium halides, H. S. Gutowsky, G. E. Pake, and R. Bersohn—643

Magnetic Susceptibilities

Anomalous magnetic behavior of UI_3 from 1–4.2°K, L. D. Roberts, D. E. Lavalle, and R. A. Erickson—1145(L)
Cation distribution and *g* factors of certain spinels containing Ni^{++}, Mn^{++}, Co^{++}, Al^{+++}, Ga^{+++}, and Fe^{+++}, Selma Greenwald, Stanley J. Pickart, and Frederick H. Grannis—1597
Curie point transitions in phosphides and arsenides of manganese, Keith H. Sweeny and Allen B. Scott—917
Magnetic behavior of the system CoO—MgO at elevated temperatures, Norman Elliott—1924
Magnetic moments of some octahedral complexes of iridium, Eric N. Sloth and Clifford S. Garner—2064
Magnetic suscepibilities of K_2MoCl_6 and $RuCl_3$, Charles Epstein and Norman Elliott—634
Magnetic susceptibilities of Np^{+6}, Np^{+5}, Np^{+4}, Dieter M. Gruen and Clyde A. Hutchison, Jr.—386
Nonempirical calculation of the diamagnetic anisotropy of benzene, Takashi Itoh, Kimio Ohno, and Hiroyuki Yoshizumi—947(L)
Rotational magnet moments of $KClFeCl_2$ and $KBrFeBr_2$, P. Kusch—1203

Mass Spectra

Appearance potential studies. I. Determination of excess kinetic energy, Richard J. Kandel—1496
Benzyl-hydrogen bond dissociation energy from electron impact measurements, D. O. Schissler and D. P. Stevenson—151(L)
Cross sections for charge transfer collisions of low-energy ions in N_2 and O_2, Roy F. Potter—974
Direct determination of the heat of sublimation of carbon, William A. Chupka and Mark G. Inghram—1472(L)
Electron impact studies of some aromatic hydrocarbons. Implications regarding certain aromatic reactions, F. H. Field and J. L. Franklin—1895
Electron-induced water decomposition and its relation to mass spectrometric C_3^+ measurements in graphite vapor, Dwight A. Hutchison—1789(L)
Formation of negative ions in hydrocarbon gases, T. L. Bailey, J. M. McGuire, and E. E. Muschlitz, Jr.—2088(L)
Free radicals by mass spectrometry. VI. The bond dissociation energies of some methyl, allyl, and benzyl compounds by electron impact, F. P. Lossing, K. U. Ingold, and I. H. S. Henderson—1489
Free radicals by mass spectrometry. V. The ionization potentials of methyl, allyl, and benzyl radicals, F. P. Lossing, K. U. Ingold, and I. H. S. Henderson—621
Heats of sublimation and evaporation of germanium, Richard E. Honig—1610(L)
Ionization and dissociation by electron impact; methylene, methyl, and methane, A. Langer, J. A. Hipple, and D. P. Stevenson—1836
Ions of high kinetic energy in mass spectra of polyatomic molecules, Fred L. Mohler, Vernon H. Dibeler, and Robert M. Reese—394
Mass spectrometric analysis of ions from the field microscope, Mark G. Inghram and Robert Gomer—1279(L)
Mass spectrometric detection of free OH radical in the thermal decomposition products of H_2O vapor, T. Tsuchiya—1784(L)
Mass spectrometric study of the evaporation products of strontium oxide on platinum, P. W. Bickel and L. V. Holroyd—1793
Mass spectrometric study of the molecular sublimation of graphite, Richard E. Honig—126
Method of determining the dissociation energy of nitrogen, W. F. Sheehan, Jr.—1461(L)
Studies of ionization efficiency. Part IV. The electron spectra of some simple molecules, J. D. Morrison—1219
Study of carbon monoxide, nitrogen, propylene, and benzene ionization probability curves near threshold, R. E. Fox and W. M. Hickam—2059
Sublimation studies of silicon in the mass spectrometer, Richard E. Honig—1610(L)
s-Triazine. IV. The mass spectrum, C. M. Judson, R. J. Francel, and J. A. Weicksel—1258(L)

Mechanics, Classical

Bipyramidal XY_3Z_2 molecular model. Part I. Classical vibration problem, Joseph S. Ziomek—1001
Lattice vibrational spectrum of imperfect crystals, Kenneth F. Stripp and John G. Kirkwood—1579

Mechanics, Quantum

Activation energy of the $H+H_2$ reaction, Virginia Griffing and Joseph T. Vanderslice—1142(L)
Approximate analytic solution of the Thomas-Fermi equation for atom, T. Tietz—2094(L)
Approximate integral evaluations used in the molecular quantum mechanics of non-linear molecules, Roland S. Barker and Henry Eyring—2072
Approximation of molecular orbitals in diatomic molecules by diatomic orbitals, Richard F. Wallis and Hugh M. Hulburt—774
Bond angle, dipole moment, and base strength, Julian H. Gibbs—1460(L)
Box model and electron densities in conjugated systems, John R. Platt—1448
Calculation of ionization potentials, J. L. Franklin—1304
Configurational interaction in simple theory, W. Moffitt—1820
Covalent boron-boron bonds in crystals of certain metal borides, Inga Fischer-Hjalmars and Stig Flodmark—1950(L)
Delta potential function model for electronic energies in molecules, Arthur A. Frost—1613(L)
Development of a quantum-mechanical model for the lithium fluoride molecule, G. C. Benson and B. M. E. van der Hoff—469
Double bond character of conjugated carbon-chlorine bonds, R. Bersohn—2078
Effect of nonrigidity on the line strengths of vibrational-rotational transitions, Henry C. Allen, Jr.—83
Electronic spectra of cata-condensed hydrocarbons, William Moffitt—320
Electronic structure of disordered one-dimensional chains, Rolf Landauer and Joseph C. Helland—1655
Electronic structure of the amylose-iodine complex, Hideo Murakami—367

Mechanics, Quantum (continued)
Electronic structures of the CH radical, Jiro Higuchi—1339
Equilibrium theory of unimolecular reactions, J. Calvin Giddings and Henry Eyring—538
Evaluation of some electron repulsion integrals needed in molecular quantum mechanics. A method of calculation of two electron multi-center repulsion integrals without the use of the Neumann expansion, Roland S. Barker and Henry Eyring—1177
Evaluation of some electron repulsion integrals needed in molecular quantum mechanics. II. Use of the Neumann expansion in evaluation of two electron three-center repulsion integrals, Roland S. Barker and Henry Eyring—114
Exchange energy of electrons in metals and ionic crystals, John R. Reitz—595
Exchange potential in the statistical model of atoms, C. J. Nisteruk and H. J. Juretschke—2087(L)
Free electron model for tropolone, Sadhan Basu—1776(L)
Free-electron network model for conjugated systems. V. energies and electron distributions in the FE MO model and in the LCAO MO model, Klaus Ruedenberg—1878
Free electron network model for cyanines and diphenyl polyenes, Sadhan Basu—1270(L)
Free-electron theory and the virial theorem, William Lichten—1278(L)
Free electron treatment of the orientation of substituents in aromatic molecule, Sadhan Basu—1952(L)
Gaussian functions in molecular integrals, Ryoichi Kikuchi—148(L)
Hybridization and ionic character in CH_3Cl, Paul N. Schatz—1974
Hybridization and ionic character in the hydrogen chloride molecule, Paul N. Schatz—695
Influence of intramolecular repulsion on bond energies, Norbert W. Luft—1260(L)
Ionization potentials and electronic structures of methyl and ethyl fluoride, C. A. McDowell and B. C. Cox—946(L)
Lower electronic states of the free NH_2 radical, Jiro Higuchi—1467(L)
Maxima in the potential energy-distance functions of diatomic molecules, R. F. Barrow—573(L)
Modification of the naive MO method, Lionel Goodman and Harrison Shull—1138(L)
Modified atomic orbital method with its application to ethylene and oxygen, Kimio Ohno and Takashi Itoh—1267(L)
Modified transition state theory of reaction rates, F. A. Matsen—165
Molecular orbital theory of orientation in aromatic, heteroaromatic, and other conjugated molecules, Kenichi Fukui, Teijiro Yonezawa, Chikayoshi Nagata, and Haruo Shingu—1433
Nitrogen electronegativity correction in free electron network theory, Sadhan Basu—1625(L)
Nonequivalent zinc bonds in chalcophanite, D. P. Craig and A. D. Wadsley—346(L)
Note on the hybrids in the nontetrahedral carbon atom, M. Mashima—1785(L)
Note on the theory of directed valence, Ta-You Wu—1125
Quantum-mechanical equation of reaction rates, Iwao Yasumori and Kenji Fueki—1790(L)
Quantum-mechanical study of the fluorine molecule, Hans Dinger and Inga Fischer-Hjalmars—346(L)
Quantum-mechanical treatment of the symmetrical hydrogen bridge, A. N. Baker, Jr.—1625(L)
Relation between energy levels of substituent groups and electron migration effects in some monosubstituted benzenes, Saburo Nagakura and Jiro Tanaka—236
Relation between the chemical reactivity and energy levels of the chemical reagent, S. Nagakura and J. Tanaka—563(L)
Relation of nuclear quadrupole couplings to the chemical bond, Walter Gordy—1470(L)
Resonance energy of graphite, Gordon M. Barrow—953(L)
Resonance energy of graphite, G. S. Colladay—2085(L)
Rotational energy transfer in H_2, Robert Brout—934
Self-consistent field method and the benzene molecule, C. R. Mueller—1950(L)
Self-consistent orbitals for radicals, J. A. Pople and R. K. Nesbet—571(L)
Semiempirical potential energy functions. I. The H_2 and H_2^+ diatomic molecules, Arthur A. Frost and Boris Musulin—1017
Semiempirical treatment of $\pi-\pi$ transitions, Lionel Goodman and Harrison Shull—1138(L)
"Smoothed potential" theory of chemical binding, James R. Arnold—757(L)
Stability of metallo-organic compounds. II, H. H. Jaffé—1462(L)
Structure of the nitric oxide dimer, W. J. Orville-Thomas—1267(L)
Symmetry and stability in diborane and in borine, G. W. Castellan—536
Tables of statistical electron distributions for atoms with degree of ionization zero to four and of the corresponding electrostatic potentials, L. H. Thomas—1758
Temperature dependence of the molecular polarization of ammonia, Mikio Katayama—1473
Theoretical study of the colored alkali oxides, Inga Fischer-Hjalmars and Barbro Grabe—1259(L)
Theory of absorption spectra of cata-condensed hydrocarbons according to Platt's circular model of free electrons, Gentaro Araki and Tomokazu Murai—954(L)
Theory of absorption spectra of unsymmetrical cyanines, Gentaro Araki and Sigeru Huzinaga—1141(L)
Theory of the interaction of hindered internal rotation with over-all rotations. I. Symmetric rotors: Methyl silane, Daniel Kivelson—1733
Unified orbital treatment of ethylene, C. R. Mueller—120
United atom-separated atom treatment of H_2^+, J. R. Streetman and F. A. Matsen—1366
Use of atomic term values in molecular wave functions, Charles W. Scherr—149(L)
Use of electron repulsion integral approximations in molecular quantum mechanics, Roland S. Barker, Henry Eyring, Charles J. Thorne, and Don A. Baker—699
Use of nuclear attraction integral approximations in molecular quantum mechanics, Roland S. Barker and Henry Eyring—1182
Valence structure of the boron hydrides, W. H. Eberhardt, Bryce Crawford, Jr. and William N. Lipscomb—989
Vibrational intensities in diatomic infrared transitions. The vibrational matrix elements for CO, Robert C. Herman and Kurt E. Shuler—481
Vibrational relaxation times in gases (three-dimensional treatment), Robert N. Schwartz and Karl F. Herzfeld—767

Mechanics, Statistical
Calculation of the moments of the vibrational frequency distributions of single crystals, Thomas H. Walnut—692
Critique of a method of treating the effect of excluded volume in polymer chains, Robert J. Rubin—241
Derivations of Onsager's reciprocal relations, Eugene P. Wigner—1912

Determination of adsorption energy heterogeneity of solid surfaces, Jurgen M. Honig and Edward L. Hill—851
Dielectric polarization in polar substances. Remark on a paper by F. E. Harris and B. J. Alder, H. Frohlich—1804
Equilibrium theory of unimolecular reactions, J. Calvin Giddings and Henry Eyring—538
Equivalence of Chang's and Nakamura's theories of hindered rotation in molecular crystals, Hubert M. James and Theodore J. Krieger—959(L)
Frequency spectrum and specific heat of a face-centered cubic lattice. I, Carl W. Garland and George Jura—1108
Frequency spectrum and specific heat of a face-centered cubic lattice. II. Low temperature region, Carl W. Garland and George Jura—1114
Further results on Monte Carlo equations of state, Marshall N. Rosenbluth and Arianna W. Rosenbluth—881
Heat of sublimation of graphite and the composition of carbon vapor, George Glocker—159
High temperature equation of state by a perturbation method. I. Nonpolar gases, Robert W. Zwanzig—1420
Intermolecular potentials of helium and hydrogen, Edward A. Mason and William E. Rice—522
Lattice vibrational spectrum of imperfect crystals, K. F. Stripp and J. G. Kirkwood—1579
Markoff random processes and the statistical mechanics of time-dependent phenomena. II. Irreversible processes in fluids, Medville S. Green—398
Mean dimensions of rubber-like molecules, T. B. Grimley —1134(L)
Modified transition state theory of reaction rates, F. A. Matsen—165
Note on the temperature variation of the configurational energy of regular solutions, P. K. Katti and S. M. Bhagat—1951(L)
Onsager's theory of the dielectric constant of polar liquids, R. O. Davies and B. K. Scaife—148(L)
Order-disorder phenomena, Bruno Linder—970
N-particle distribution functions, H. L. Frisch—1713
Phase transition, Shigetoshi Katsura—1277(L)
Polar *versus* nonpolar ice, R. E. Rundle—344(L)
Proposal for fundamental equations of dynamics of gases under high stress (A proposal for statistical mechanical treatment of systems not in thermal equilibrium associated with transport phenomena), Toyoki Koga—1633
Random walk with semiadsorbing barrier, Frank C. Goodrich—588
Residual entropy of the polar structure of ice, William N. Lipscomb—344(L)
Second virial coefficients of gases obeying a modified Buckingham (exp-six) potential, William E. Rice and Joseph O. Hirschfelder—187
Solution of the Boltzmann equation for a shock wave using a restricted variational principle, Phillip Rosen—1045
Specific heats of single solids and moments of elastic frequency spectra, Jenn-Lin Hwang—154(L)
Statistical computation of mean dimensions of macromolecules. I, F. T. Wall, L. A. Hiller, Jr., and D. J. Wheeler—1036
Statistical interpretations of unimolecular reaction rates, Harold S. Johnston and James R. White—1969
Statistical mechanical derivation of Onsager's equation for dielectric polarization, Frank E. Harris and Berni J. Alder—1806
Statistical mechanical theory of transport processes. VII. The coefficient of thermal conductivity of monatomic liquids, Robert W. Zwanzig, John G. Kirkwood, Irwin Oppenheim, and Berni J. Alder—783
Statistical-mechanical theory of transport processes. VIII. Quantum theory of transport in gases, John Ross and John G. Kirkwood—1094
Statistical thermodynamics of associated solutions, J. A. Barker and F. Smith—375
Thermodynamic functions of hydrogen isocyanate, Norbert W. Luft and Om P. Kharbanda—956(L)
Thermodynamic properties of gaseous titanium, Harwood G. Kolsky and Paul W. Gilles—232
Thermodynamics of phase transitions in compressible solid lattices, O. K. Rice—1535
Third virial coefficient of a Lennard-Jones gas by Kihara's method with tables for the 6-9 potential, Leo F. Epstein, Celesta J. Hibbert, Marion D. Powers, and Glenn M. Roe—464
Transport properties of gases obeying a modified Buckingham (exp-six) potential, William E. Rice and Joseph O. Hirschfelder—187
Virial expansion of the osmotic pressure in the Donnan membrane equilibrium, Terrell L. Hill—1251

Metals
Charge-transfer-no-bond adsorption, F. A. Matsen, A. C. Makrides, and N. Hackerman—1800
Curie point transitions in phosphides and arsenides of manganese, Keith H. Sweeny and Allen B. Scott—917
Electrically and elastically active relaxation modes, Y. Haven and J. H. van Santen—1146(L)
Exchange energy of electrons in metals and ionic crystals, John R. Reitz—595
Frequency spectrum and specific heat of a face-centered cubic lattice. I, Carl W. Garland and George Jura—1108
Lattice dynamics of body-centered and face-centered cubic metallic elements. II, Jules de Launay—1676
Neutron diffraction study of liquid mercury, George H. Vineyard—1665
Order-disorder phenomena, Bruno Linder—970
Vapor pressure of uranium, Everett G. Rauh and Robert J. Thorn—1414
Vapor pressure of zinc between 150° and 350°C, John D. McKinley, Jr. and John E. Vance—1120

Microwave (see **Absorption Spectra**)
Molecular Films (see **Surface Phenomena**)
Molecular Spectra (see **Absorption Spectra and Fluorescence**)
Molecular Structure and Constants (see also **Absorption Spectra, Electron, and X-Ray Diffraction**)
Analysis of the near ultraviolet absorption spectrum of acetylene, K. Keith Innes—863
Appearance potential studies. I. Determination of excess kinetic energy, Richard J. Kandel—1496
Application of a high-speed digital computer to molecular vibration problems, D. E. Mann, L. Fano, W. F. Cahill, and T. Shimanouchi—764(L)
Assignment of the intense 'acene absorption systems, D. P. Craig, P. C. Hobbins, and J. R. Walsh—1616(L)
Assignment of torsional frequencies in some halogenated ethanes, Norbert W. Luft—155(L)
Assignments of the raman and infrared frequencies of 1,2-dichloroethane observed in the gaseous, liquid, and solid states, Ichiro Nakagawa and San-Ichiro Mizushima —759(L)
Bending fundamental of NO_2, Melvin Brown and M. Kent Wilson—955(L)
Benzyl-hydrogen bond dissociation energy, J. B. Farmer, I. H. S. Henderson, C. A. McDowell, and F. P. Lossing —1948(L)
Bipyramidal XY_3Z_2 molecular model. Part I. Classical vibration problem, Joseph S. Ziomek—1001
Bond angle, dipole moment, and base strength, Julian H. Gibbs—1460(L)

Molecular Structure and Constants (continued)
Boron arrangement in a B_9 hydride, K. Eriks, William N. Lipscomb, and Riley Schaeffer—754(L)
Box model and electron densities in conjugated systems, John R. Platt—1448
Bromination of hydrocarbons. VII. Bromination of Isobutane. Bond dissociation energies from bromination kinetics, Bernard H. Eckstein, Harold A. Scheraga, and Ervin R. Van Artsdalen—28
Bromine nuclear quadrupole resonances, P. J. Bray—950 (L)
Bromine quadrupole spectra and Hammett's sigma values, P. J. Bray—1787(L)
Calculation of equilibrium constants for several exchange reactions of nitrogen-15 between oxy compounds of nitrogen, W. Spindel—1271(L)
Carbon-carbon bond dissociation energies in the cycloalkanes, Frank H. Seubold, Jr.—945(L)
C—C bond dissociation energies in cyclanes, H. O. Pritchard and A. F. Trotman-Dickenson—944(L)
Cl in SO_2Cl pure quadrupole spectra, P. J. Bray and D. Esteva—570(L)
Conjugation of several phenyl radicals bonded to a single central atom, H. H. Jaffé—1430
Contributions of vibrational anharmonicity and rotation-vibration interaction to thermodynamic functions, R. E. Pennington and K. A. Kobe—1442
Correlation between infrared intensities, dissociation energies and equilibrium internuclear distances for diatomic molecules, Henry Aroeste—1273(L)
Cross sections for charge transfer collisions of low-energy ions in N_2 and O_2, Roy F. Potter—974
Crystal and molecular structure of B_5H_{11}, Louis R. Lavine and William N. Lipscomb—614
Crystal structure of paradichlorobenzene, Bruce C. Lutz—1618(L)
Deductions about hybridization from nuclear quadrupole coupling constants, Paul N. Schatz—755(L)
Determination of some carbon-chlorine bond dissociation energies, M. Szwarc and J. Watson Taylor—270
Determination of the potential constants of SO_2 from centrifugal distortion effects, Daniel Kivelson—904
Deuterium effect on hydrogen bond distances in hafnium dihydride, S. S. Sidhu—1062
Development of a quantum-mechanical model for the lithium floride molecule, G. C. Benson and B. M. E. van der Hoff—469
Dichroism of the crystal of dicyclopentadienyl-iron, Shoichiro Yamada, Akitsugu Nakahara, and Ryutaro Tsuchida—1620(L)
Dichroism of the crystal of diformylhydrazine, Shoichiro Yamada and Ryutaro Tsuchida—1629(L)
Dipole moments, nuclear quadrupole coupling, and the bonding orbitals in group *V*-trihalides, Paul Kisliuk—86
Discrepancy in the rotational constants of bromoform, Gabriel Herrman—2093(L)
Dissociation energy of fluorine, R. T. Sanderson—345(L)
Dissociation energy of N_2, J. M. Hendrie—1503
Distribution of kinetic and potential energy in vibrating molecules, William J. Taylor—1780(L)
Double bond character of conjugated carbon-chlorine bonds, R. Bersohn—2078
Eckart conditions in Wilson's treatment of molecular vibrations, Robert J. Malhiot and Salvador M. Ferigle —717
Effect of intermolecular interactions between CH frequencies on the infrared spectra of *N*-paraffins and polythene, R. S. Stein and G. B. B. M. Sutherland—1993
Effect of iodine on the infrared spectra of the alkyl iodides, Robert H. Schuler—947(L)
Effect of nonrigidity on the line strengths of vibrational-rotational transitions, Henry C. Allen, Jr.—83
Effect of pressure on thermal diffusion in *n*-paraffin hydrocarbon-CS_2 mixtures, W. M. Rutherford and H. G. Drickamer—1284
Effects of internal motion in the microwave spectrum of methyl amine, David R. Lide, Jr.—1613(L)
Electrical conductivity of supercritical solutions of sodium chloride and water, James K. Fogo, Sidney W. Benson, and Charles S. Copeland—212
Electron distribution in molecules. IV. Phosphorus magnetic resonance shifts, H. S. Gutowsky and D. W. McCall—162
Electron impact studies of some aromatic hydrocarbons. Implications regarding certain aromatic reactions, F. H. Field and J. L. Franklin—1895
Electron-induced water decomposition and its relation to mass spectrometric C_3^+ measurements in graphite vapor, Dwight A. Hutchison—1789(L)
Electron scattering and internal rotation, J. Karle—1246
Electronic structure of the amylose-iodine complex, Hideo Murakami—367
Electronegativities and some electron affinities of copper, zinc, and gallium subgroup elements, Aubrey P. Altshuller—765(L)
Elementary processes in the radiation chemistry of water, Keith J. Laidler—1740
Ellipsoidal molecular shape and dielectric relaxation-analysis, J. Ph. Poley—1466(L)
Energy difference of the two rotational isomers of 1,2-dichloroethane in various solutions, Akiyoshi Wada and Yonezo Morino—1276(L)
Entropies of complex ions in aqueous solution, P. George, G. I. H. Hanania, and D. H. Irvine—1616(L)
Equilibrium constant, infrared spectrum, and thermodynamic properties of bromine chloride, H. C. Mattraw, C. F. Pachucki, and N. J. Hawkins—1117
Excited states of the naphthalene molecule. I. Symmetry properties of the first two excited singlet states, Donald S. McClure—1668
Experimental study of the vibrational spectra of hexamethyldisilane and related compounds, C. C. Cerato, J. L. Lauer, and H. C. Beachell—1
Experimental value of the force constant of the SH radical, Sydney Leach—1261(L)
Far ultraviolet absorption spectra of selected isomeric hexenes, Julia T. Gary and Lucy W. Pickett—1266(L)
Far ultraviolet absorption spectra of the isomeric butenes, Julia T. Gary and Lucy W. Pickett—599
Fine structure in absorption spectrum of tricesium cobaltous pentachloride in crystalline state, Shoichiro Yamada and Ryutaro Tsuchida—1273(L)
Fluorescence spectrum of triphenylmethyl at 4°K, S. I. Weissman—155(L)
Force constants of hydrides, Shashanka Shekhar Mitra—564(L)
Force constants of the halides of the III and IV group elements, Shashanka Shekhar Mitra—2097(L)
Force constants of the hydrides of the second and third periods, S. S. Mitra and Y. P. Varshni—1269(L)
Force constants for F_2CO and thermodynamic properties for F_2CO and FClCO, R. J. Lovell, C. V. Stephenson, and E. A. Jones—1953
Formation of negative ions in hydrocarbon gases, T. L. Bailey, J. M. McGuire, and E. E. Muschlitz, Jr.—2088 (L)
Free electron model for tropolone, Sadhan Basu—1776(L)
Free-electron network model for conjugated systems. V. Energies and electron distributions in the FE MO model and in the LCAO MO model, Klaus Ruedenberg—1878

Free electron network model for cyanines and diphenyl polyenes, Sadhan Basu—1270(L)
Free electron treatment of the orientation of substituents in aromatic molecule, Sadhan Basu—1952(L)
Free radicals by mass spectrometry. V. The ionization potentials of methyl, allyl, and benzyl radicals, F. P. Lossing, K. U. Ingold, and I. H. S. Henderson—621
Free radicals by mass spectrometry. VI. The bond dissociation energies of some methyl, allyl, and benzyl compounds by electron impact, F. P. Lossing, K. U. Ingold, and I. H. S. Henderson—1489
Frequency assignments for normal aliphatic compounds: I. The normal paraffins in the range 1450 cm^{-1} to 650 cm^{-1}, Hubert Tschamler—1845
Further evidence for the existence of the gauche-form of 1,2-dichloroethane, San-Ichiro Mizushima, Ichiro Nakagawa, Isao Ichishima, and Tatsuo Miyazawa—1614(L)
Geometry of VIX_4 molecules, Felix Lachman—1459(L)
Ground and excited electronic states of phosgene, Jules Duchesne—1464(L)
Heat of formation of CF_3 and some bond dissociation energies for fluorocarbons, B. S. Rabinovitch and J. F. Reed—2092(L)
Heat of formation of $NH(g)$ and the bond dissociation energy $D(NH-H)$, Aubery P. Altshuller—1947(L)
Heat of sublimation of graphite and the composition of carbon vapor, George Glocker—159
High speed machine computation of ideal gas thermodynamic functions. I. The isotopic water molecules, Abraham S. Friedman and Lester Haar—2051
Hybridization and ionic character in the hydrogen chloride molecule, Paul N. Schatz—695
Hydrogen bonding in sodium trifluoroacetate-trifluoroacetic acid compounds, W. Klemperer and G. C. Pimentel—1399
Hyperfine splittings in polyatomic free radicals, S. I. Weissman—1378
I_4: A charge-transfer molecular complex? Harden McConnell—760(L)
Influence of intramolecular repulsion on bond energies, Norbert W. Luft—1260(L)
Influence of permanent multipole interactions on vibrational deactivation in molecular collisions, F. W. de Wette and Z. I. Slawsky—1620(L)
Influence of solvent upon the energy difference between rotational isomers, Akiyoshi Wada—198
Infrared absorption investigation on the rotational isomerism of 1,1,2-trichloroethane, Kenji Kuratani and San-Ichiro Mizushima—1403
Infrared absorption spectra of aqueous HF_2^-, DF_2^-, and HF, Llewellyn H. Jones and Robert A. Penneman—781
Infrared absorption spectra of complex cobalt salts, Douglas G. Hill, and Alexander F. Rosenberg—148(L)
Infrared and raman spectra of carbon suboxide, H. D. Rix—429
Infrared and raman spectra of 1,1-dimethylhydrazine and trimethylhydrazine, E. R. Shull, J. L. Wood, J. G. Aston, and D. H. Rank—1191
Infrared and raman spectra of formaldehyde-d_1 vapor, D. W. Davidson, B. P. Stoicheff, and H. J. Bernstein—289
Infrared band of a molecular complex between hydrogen fluoride and chlorine trifluoride, J. Paul Pemsler and D. F. Smith—1834
Infrared dichroism in the 13.8μ band of n-$C_{36}H_{74}$ single crystals and polyethylene, Samuel Krimm—567(L)
Infrared evidence for collagen structures, G. B. B. M. Sutherland, K. Nolen Tanner, and D. L. Wood—1621(L)
Infrared spectra and structure of LiOH, $LiOH \cdot H_2O$ and the deuterium species. Remark on fundamental frequency of OH^-, Llewellyn H. Jones—217
Infrared spectra of CH_3COONa, and CD_3COONa and assignments of vibrational frequencies, Llewellyn H. Jones and Eugene McLaren—1796
Infrared spectra of monochlorogermane and monochlorogermane-d_3, R. C. Lord and C. M. Steese—542
Infrared spectra of thionyl chloride and sulfuryl chloride, Dowell E. Martz and Robert T. Lagemann—1193
Infrared spectra studies of BrF_3 and BrF_5, H. M. Haendler, S. W. Bukata, B. Millard, E. I. Goodman, and J. Littman—1939(L)
Infrared spectrum and hydrogen bonding of pyrrole, P. Tuomikoski—2096(L)
Infrared spectrum and molecular constants of C_2D_2, Robert M. Talley and Alvin H. Nielsen—2030
Infrared spectrum and molecular constants of $C^{14}O_2$, Alvin H. Nielsen and Robert T. Lagemann—36
Infrared spectrum and molecular constants of DBr, Fred L. Keller and Alvin H. Nielsen—294
Infrared spectrum and structure of collagen, Richard M. Badger and A. D. E. Pullin—1142(L)
Infrared spectrum and thermodynamic functions of formamide, J. C. Evans—1228
Infrared spectrum of σ_2 for $B^{10}F_3$ and $B^{11}F_3$, Alvin H. Nielsen—659
Infrared spectrum of crystalline nitrogen pentoxide, Roy Ternaishi, and J. C. Decius—896
Infrared spectrum of disilane, H. S. Gutowsky and E. O. Stejskal—939
Infrared spectrum of hydrogen sulfide. II. The 5100 cm^{-1} region, Harry C. Allen, Jr. and Earle K. Plyler—1104
Infrared spectrum of ketene, Børge Bak and F. Allan Andersen—1050
Infrared spectrum of $S^{16}O^{18}O$ and the potential constants of SO_2, Santiago R. Polo and M. Kent Wilson—900
Infrared studies of solutions involving aromatics and halogens, Wolfgang Haller, George Jura, and George C. Pimentel—720
Infrared study of the effect of solvent upon ν(NH) in pyrrole, Marie-Louise Josien and Nelson Fuson—1169
Intensity of the bending mode in carbonyl sulphide, Edward C. Wingfield and Joseph W. Straley—1949(L)
Intensities of the infrared bands of carbon suboxide, R. L. Williams—345(L)
Inter- and intramolecular energy transfer processes. 4. Hydrogen-hydrocarbon systems, Margaret M. Moodie and C. Reid—1126
Intermolecular coupling of the out-of-plane bending mode in several carbonates, J. C. Decius—1946(L)
Intermolecular potentials for some simple nonpolar molecules, Edward A. Mason and William E. Rice—843
Interpretation of the spectrum of bromoform, Shoji Kojima and Kineo Tsukada—2093(L)
Investigation of the microwave spectrum of pyridine, K. E. McCulloh and Gilbert F. Pollnow—681
Ionicity of gaseous thallous chloride, Aubrey P. Altshuller—573(L)
Ions of high kinetic energy in mass spectra of polyatomic molecules, Fred L. Mohler, Vernon H. Dibeler, and Robert M. Reese—394
Ionization and dissociation by electron impact; methylene, methyl, and methane, A. Langer, J. A. Hipple, and D. P. Stevenson—1836
Isotope effect in continuous ultraviolet absorption spectra: methyl bromide-d_3 and chloroform-d, Adon A. Gordus and Richard B. Bernstein—790
$J=0\rightarrow1$ rotational transition of trifluoroiodomethane, Fred Sterzer—2094(L)

Molecular Structure and Constants (continued)
l-Type doubling in C_2H_2 and HCN, T. A. Wiggins, J. N. Shearer, E. R. Shull, and D. H. Rank—547
Liberational heat capacity of ice and of heavy ice, R. W. Blue—280
Magnetic moments of some octahedral complexes of iridium, Eric N. Sloth and Clifford S. Garner—2064
Magnetic susceptibilities of Np^{+6}, Np^{+5}, Np^{+4}, Dieter M. Gruen and Clyde A. Hutchison, Jr.—386
Magnitudes of barriers in intramolecular rotation, N. W. Luft—1814
Maxima in the potential energy-distance functions of diatomic molecules, R. F. Barrow—573(L)
Mean dimensions of rubber-like molecules, T. B. Grimley —1134(L)
Microwave absorption by the nonpolar gas CO_2, G. Birnbaum, A. A. Maryott, and P. F. Wacker—1782(L)
Microwave determination of the structure of pyridine, Børge Bak, Lise Hansen, and John Rastrup-Andersen —2013
Microwave investigation of hindered rotation and inversion of methylamine, K. Shimoda, T. Nishikawa, and T. Itoh—1456(L)
Microwave spectra and structures of methyl mercury chloride and bromide, Walter Gordy and John Sheridan —92
Microwave spectra, structure, and dipole moment of stable pentaborane, Henry J. Hrostowski and Rollie J. Myers—262
Microwave spectrum and barrier to internal rotation of nitromethane, Eileen Tannenbaum, Russell D. Johnson, Rollie J. Myers, and William D. Gwinn—949(L)
Microwave spectrum and dipole moment of pyridine, Billy B. DeMore, W. S. Wilcox, and J. H. Goldstein—876
Microwave spectrum and molecular structure of $(CH_3)_3$ SiF, R. C. Gunton, J. F. Ollom, and H. N. Rexroad—1942(L)
Microwave spectrum and properties of vinylene carbonate, Geo. R. Slayton, J. W. Simmons, and J. H. Goldstein—1678
Microwave spectrum and structure of benzonitrile, David R. Lide, Jr.—1577
Microwave spectrum of benzonitrile, Gunnar Erlandsson—1152(L)
Microwave spectrum of cyclopentanone, Gunnar Erlandsson—563(L)
Microwave spectrum of ethyl chloride, Roselin S. Wagner and B. P. Dailey—1459(L)
Microwave spectrum of fluorobenzene, K. E. McCulloh and Gilbert F. Pollnow—1144(L)
Microwave spectrum of formic acid, Ralph Trambarulo and Paul M. Moser—1622(L)
Microwave spectrum of hydrogen peroxide, J. T. Massey and D. R. Bianco—442
Microwave spectrum of pyridine, Børge Bak, Lise Hansen, and John Rastrup-Anderson—565(L)
Microwave spectrum of vinyl cyanide, W. S. Wilcox, J. H. Goldstein, and J. W. Simmons—516
Microwave spectrum of vinyl iodide, C. D. Cornwell and R. L. Poynter—1257(L)
Millimeter wave spectra and centrifugal stretching constants of the methyl halides, W. J. Orville Thomas, J. T. Cox, and Walter Gordy—1718
Molecular orbital theory of orientation in aromatic, heteroaromatic, and other conjugated molecules, Kenichi Fukui, Teijiro Yonezawa, Chikayoshi Nagata, and Haruo Shingu—1433
Molecular structure of 1,1,2,2-tetrafluorodichloroethane, M. Iwasaki, S. Nagase, and R. Kojima—959(L)
N^{15} isotope shift of the perpendicular bending frequency in KNO_3 and $NaNO_3$, J. C. Decius—1941(L)
Near infrared spectrum and the internuclear distances of nitrous oxide, A. E. Douglas and C. K. Møller—275
Near ultraviolet absorption spectrum of *para*-difluorobenzene vapor, C. Dewey Cooper—503
New analysis of the effect of polar solvents upon ν(NH) of pyrrole, Marie-Louise Josien and Nelson Fuson—1264(L)
Nitrogen electronegativity correction in free electron network theory, Sadhan Basu—1625(L)
Nonempirical calculation of the diamagnetic anisotropy of benzene, Takashi Itoh, Kimio Ohno, and Hiroyuki Yoshizumi—947(L)
Nonequivalence of chlorine atoms in phosphorus pentachloride, James Downs and Rowland E. Johnson—143 (L)
Note on the fluorine resonance shifts, A. Saika and C. P. Slichter—26
Note on the hybrids in the nontetrahedral carbon atom, M. Mashima—1785(L)
Nuclear magnetic resonance spectra and structure of borohydride ion and diborane, Richard A. Ogg, Jr.—1933
Nuclear quadrupole couplings in solid bromides and iodides, Hugh Robinson, H. G. Dehmelt, and Walter Gordy—511
Nuclear quadrupole resonance in ethyl chloroformate and ethyl trichloroacetate, T. L. Weatherly and Quitman Williams—958(L)
Nuclear quadrupole resonances in solid aryl bromides and iodides, R. G. Barnes, O. B. Miller, and F. O. Wooten—946(L)
Nuclear quadrupole resonances in some chlorine compounds, Quitman Williams and T. L. Weatherly—572 (L)
Oxidation ions in hydrocarbons on ultraviolet irradiation, Andrew Gemant—1705
Paramagnetic resonance absorption in triphenylmethyl and dimesitylmethyl, H. S. Jarrett and G. J. Sloan—1783(L)
Paramagnetic resonance absorption of violanthrone and violanthrene, Y. Yokozawa, and I. Tatsuzki—2087(L)
Paramagnetic resonance spectra of Wurster's free radical ions, S. I. Weissman—1135(L)
Photoionization and total absorption cross section of gases. I. Ionization potentials of several molecules. Cross sections of NH_3 and NO, K. Watanabe—1564
Polar solvent effects on the absorption spectra of metallic complexes, K. Nakamoto, M. Kobayashi, and R. Tsuchida —957(L)
Polarized infrared spectrum of $KAu(CN)_2$: Revision and refinement, Llewellyn H. Jones—1135(L)
Polymorphism in solution of *cis*- and *trans*-β-methoxy-*p*-nitrochalcone, Yoshiyuki Urushibara, Fujiro Iimura, and Kenro Ikeda—1943(L)
Potassium bromide disk method for the infrared studies of coordination compounds, Thomas J. Lane, D. N. Sen, and J. V. Quagliano—1855
Proton magnetic resonance and structure of ammonium hydroxide, H. S. Gutowsky and S. Fujiwara—1782(L)
Proton magnetic resonance spectrum of ammonia, and the interaction involved in hydrogen bond association, Richard A. Ogg, Jr.—560
Pure quadrupole spectra of metal bromates, Kenji Shimomura, Toshimoto Kushida, Noriyoshi Inoue, and Yoshiro Imaeda—1944(L)
Pure quadrupole spectrum of solid hexachlorobenzene and its interpretation, Jules Duchesne and André Monfils —562(L)

Pure quadrupole spectrum of 1,2,4-trichlorobenzene, André Monfils and Jules Duchesne—1275(L)
Quantum-mechanical study of the fluorine molecule, Hans Dinger and Inga Fischer-Hjalmars—346(L)
Quantum-mechanical treatment of the symmetrical hydrogen bridge, A. N. Baker, Jr.—1625(L)
Quenching of mercury resonance radiation. III. The total effective cross sections of some saturated compounds, B. deB. Darwent and M. K. Phibbs—110
Quenching of mercury resonance radiation. IV. Unsaturated compounds, B. deB. Darwent, M. K. Phibbs, and F. G. Hurtubise—859
Raman and infrared spectra of CF_3BR and CF_3I, Walter F. Edgell and Charles E. May—1808
Raman spectra and potential constants for CF_3Cl, CF_3Br, and CF_3I, Robert Cooper Taylor—714
Raman spectra of chlorofluoromethanes in the gaseous state, Howard H. Claassen—50
Relation between bond length and stretching frequency for the carbonyl group, M. Margoshes, F. Fillwalk, V. A. Fassel, and R. E. Rundle—381
Relation between energy levels of substituent groups and electron migration effects in some monosubstituted benzenes, Saburo Nagakura and Jiro Tanaka—236
Relation of nuclear quadrupole couplings to the chemical bond, Walter Gordy—1470(L)
Rotation in solid mixtures of neohexane and cyclopentane from 20°K to their melting points, J. G. Anton, Bouwe Bolger, Ralph Trambarulo, and H. Segall—460
Rotational constants of GeH_3D and $GeHD_3$, Louis P. Lindeman and M. Kent Wilson—1723
Rotational constants of SiH_3D, Santiago R. Polo and M. Kent Wilson—1559
Rotational energy transfer in H_2, Robert Brout—934
Rotational magnet moments of $KClFeCl_2$ and $KBrFeBr_2$, P. Kusch—1203
Rotational spectrum of PH_3, Harald H. Nielsen—1383
Second-order quadrupole effects in asymmetric tops. The microwave spectrum of vinyl iodide, H. W. Morgan and J. H. Goldstein—1427
Selection rules and frequencies of the skeletal vibrations of long chain polymers in the crystalline state, C. Y. Liang, G. B. B. M. Sutherland, and S. Krimm—1468(L)
Self-consistent field method and the benzene molecule, C. R. Mueller—1950(L)
Semiempirical potential energy functions. I. The H_2 and H_2^+ diatomic molecules, Arthur A. Frost and Boris Musulin—1017
Simultaneous vibrational transitions in the infrared absorption spectra of compressed gases, J. Fahrenfort and J. A. A. Ketelaar—1631(L)
Single-triplet absorption bands in some halogen substituted aromatic compounds, Donald S. McClure, Norman W. Blake, and Philip L. Hanst—255
Spectroscopic evidence for stabilized HO_2 radicals, Paul A. Giguere—2085(L)
Stabilization of methyl radical, I. L. Mador—1617(L)
Statistical computation of mean dimensions of macromolecules, I. F. T. Wall, L. A. Hiller, Jr., and D. J. Wheeler—1036
Structure and internal motion of hexachloroethane, D. A. Swick, I. L. Karle, and J. Karle—1242
Structure for collagen, F. H. C. Crick—347(L)
Structure of the monomer of formic acid, I. L. Karle and J. Karle—43
Structure of the perrhenate ion, Howard H. Claassen and A. J. Zielen—707
Structures of the boron hydrides, William N. Lipscomb—985
Substituted methanes. XX. Potential constants and calculated thermodynamic properties for some dibromomethanes, Jerome M. Dowling and Arnold G. Meister—1042
Substituted methanes. XVIII. Vibrational spectra of $C^{13}H_3I$, Richard B. Bernstein, Forrest F. Cleveland, and Fred L. Voelz—193
Substituted methanes. XXIV. Potential constants for CCl_2F_2, Jerome M. Dowling—1789(L)
Symbolic structural formulas for boron hydrides, John R. Platt—1033
Symmetry and stability in diborane and in borine, G. W. Castellan—536
Symmetry classification of the energy levels of some triarylmethyl free radicals and their cations, Ting Li Chu and S. I. Weissman—21
Theoretical evaluation of the normal frequencies of vibration of the ethylene oxide molecule, Samuel A. Stone—925
Theory of absorption spectra of catacondensed hydrocarbons according to Platt's circular model of free electrons, Gentaro Araki and Tomokazu Murai—954(L)
Theory of absorption spectra of unsymmetrical cyanines, Gentaro Araki and Sigeru Huzinaga—1141(L)
Theory of the interaction of hindered internal rotation with over-all rotations. I. Symmetric rotors: Methyl silane, Daniel Kivelson—1733
Thermal conductivity of organic vapors. The relationship between thermal conductivity and viscosity, and the significance of the Eucken factor, R. G. Vines and L. A. Bennett—360
Thermal diffusion in mixtures of tetrachloroethane with normal paraffin hydrocarbons, R. L. Saxton and H. G. Drickamer—1287
Thermodynamic and spectroscopic study of gaseous magnesium oxide, Leo Brewer and Richard F. Porter—1867
Thermodynamic functions for borine carbonyl, H. J. Galbraith—1461(L)
Thermodynamics of alcohol-hydrocarbon mixtures, Carl B. Kretschmer and Richard Wiebe—1697
Transformation of internal coordinates, E. J. O'Reilly, Jr.—1471(L)
s-Triazine. III. The infrared spectrum, John E. Lancaster and Norman B. Colthup—1149(L)
s-Triazine. IV. The mass spectrum, C. M. Judson, R. J. Francel, and J. A. Weicksel—1258(L)
s-Triazine. I. The unit cell, L. A. Siegel and E. F. Williams—1147(L)
Ultrasonic propagation and its relation to molecular structure in the diols, T. A. Litovitz, R. Higgs, and R. Meister—1281
Use of atomic term values in molecular wave functions, Charles W. Scherr—149(L)
Use of electron repulsion integral approximations in molecular quantum mechanics, Roland S. Barker, Henry Eyring, Charles J. Thorne, and Don A. Baker—699
Valence structure of the boron hydrides, W. H. Eberhardt, Bryce Crawford, Jr., and William N. Lipscomb—989
Variation in the quadrupole coupling constant with vibrational state in the methyl halides, J. Kraitchman and B. P. Dailey—1477
Vibration force constants of $SiO_4(CH_3)_4$, Kaoru Iguchi—1937(L)
Vibrational assignment and thermodynamic properties of *N*-dimethylaminodiborane, D. E. Mann—762(L)
Vibrational spectra and calculated thermodynamic properties of ethyl chloride and 1,1-dichloroethane, Lester W. Daasch, C. Y. Liang, and J. Rud Nielsen—1293

Molecular Structure and Constants (continued)
Vibrational spectra and structure of solid hydroxylamine and deuterohydroxylamine, R. E. Nightingale and E. L. Wagner—203
Vibrational spectra of *n*-dimethylaminodiborane, D. E. Mann—70
Vibrational spectra of trifluoroethylene and trifluoroethylene-d_1, D. E. Mann, N. Acquista, and Earle K. Plyler —1586
Vibrational spectrum and structure of nitryl chloride, Raymond Ryason and M. Kent Wilson—2000
Vibrational spectrum of bromotrifluoroethylene, D. E. Mann, N. Acquista, and Earle K. Plyler—1199
Vibrational spectrum of hexafluoro-2-butyne, Foil A. Miller and Robert P. Bauman—1544
Wavelength shifts in the near ultraviolet spectra of fluorinated benzenes, H. Spooner—234

Nucleation
Time lag in the self-nucleation, Hiromu Wakeshima—1614(L)

Nuclear Quadrupole Resonance
Bromine nuclear quadrupole resonances, P. J. Bray—950(L)
Bromine quadrupole spectra and Hammett's sigma values, P. J. Bray—1787(L)
Cl in SO_2Cl pure quadrupole spectra, P. J. Bray and D. Esteva—570(L)
Crystal structure of paradichlorobenzene, Bruce C. Lutz —1618(L)
Nuclear quadrupole couplings in solid bromides and iodides, Hugh Robinson, H. G. Dehmelt, and Walter Gordy—511
Nuclear quadrupole resonance in ethyl chloroformate and ethyl trichloroacetate, T. L. Weatherly and Quitman Williams—958(L)
Nuclear quadrupole resonances in bromobenzene derivatives, P. J. Bray and R. G. Barnes—2023
Nuclear quadrupole resonances in solid aryl bromides and iodides, R. G. Barnes, O. B. Miller, and F. O. Wooten —946(L)
Nuclear quadrupole resonances in solid bromine in iodine compounds, A. L. Schawlow—1211
Nuclear quadrupole resonances in some chlorine compounds, Quitman Williams and T. L. Weatherly—572(L)
Pure quadrupole spectra of metal bromates, Kenji Shimomura, Toshimoto Kushida, Noriyoshi Inoue, and Yoshiro Imaeda—1944(L)
Pure quadrupole spectra of solid bromine and iodine compounds, Kenji Shimomura, Toshimoto Kushida, Noriyoshi Inoue, and Yoshiro Imaeda—350(L)
Pure quadrupole spectrum of solid hexachlorobenzene and its interpretation, Jules Duchesne and André Monfils —562(L)
Pure quadrupole spectrum of 1,2,4-trichlorobenzene, André Monfils and Jules Duchesne—1275(L)

Nuclear Resonance (see **Magnetic Resonance**)

Phase Transitions
Concerning the coexistant phases in the system NaCl $-H_2O$ above 374°C, James Fogo, Sidney W. Benson, and Charles S. Copeland—1942(L)
Conductivity of supercritical solutions of sodium chloride and water, James T. Corwin and Gwilym E. Owen—1257(L)
Critical point and the phase rule, Johan van Dranen—1265(L)
Addendum: Critical temperature and pressure of normal paraffins, Yatendra Pal Varshni—1629(L)
Crystal structure of paradichlorobenzene, Bruce C. Lutz —1618(L)
Dielectric anomaly of ammonium sulfate at its transition temperature, Kan-Ichi Kaniyoshi and Toshihiko Miyamoto—756(L)
Equivalence of Chang's and Nakamura's theories of hindered rotation in molecular crystals, Hubert M. James and Theodore J. Krieger—959(L)
Germanium-oxygen system, Michael Hoch and Herrick L. Johnston—1376
Heterogeneous nucleation of crystals from vapor, G. M. Pound, M. T. Simnad, and Ling Yang—1215
Kinetics of phase transitions involving dimer reactions, H. L. Frisch and C. Willis—243
Liquid system ozone-oxygen, A. C. Jenkins and C. M. Birdsall—1779(L)
Occurrence of natural $p-n$ junctions in lead solenide, Arthur E. Goldberg and George R. Mitchell—220
Phase transition, Shigetoshi Katsura—1277(L)
Proton magnetic resonance in an ammonium chloride single crystal, R. Bersohn and H. S. Gutowsky—651
Structural investigation by means of nuclear magnetism. III. Ammonium halides, H. S. Gutowsky, G. E. Pake, and R. Bersohn—643
Successive orientational transitions in crystals, Theodore J. Krieger and Hubert M. James—796
Temperature dependence of ultrasonic velocity in plastics, S. V. Subrahmanyam—1562
Thermodynamics of phase transitions in compressible solid lattices, O. K. Rice—1535
Time lag in the self-nucleation, Hiromu Wakeshima—1614(L)
Triple point temperature of nitrogen trifluoride (66.37°K) as a possible fixed point, Louis Pierce and E. L. Pace —1271(L)

Phosphors
Electron trap distributions in phosphors, J. M. Honig—1689
Theory of concentration quenching in inorganic phosphors, D. L. Dexter and James H. Schulman—1063

Photoconductivity
Organic photoconductors. I. The kinetics of photoconductivity in rhodamine B, B. C. Nelson—885
Organic photoconductors. II. Crystal violet, R. C. Nelson —890
Organic photoconductors. III. The kinetics of basic fuchsin, R. C. Nelson—892
Polarized ultraviolet spectrum of tetracene single crystals by a photoconductance method, A. Bree and L. E. Lyons —1630(L)

Photochemistry
Diffusion effects in the photochemistry of solid films, Joseph E. Wilson—334
Fluorescence of biacetyl vapor at 4358A, Nathan A. Coward and W. Albert Noyes, Jr.—1207
Further studies on the reaction of cyclopentane with mercury-6 ($^3P_1$) atoms, P. W. Beck, D. V. Kniebes, and H. E. Gunning—678
Oxidation and reduction of aqueous ferrous-ferric sulfate induced by visible light absorption of mercuric sulfide, Leonard I. Grossweiner and Sheffeld Gordon—1139(L)
Photobleaching and photorecovery of dyes, Gerald Oster and Neil Wotherspoon—157(L)
Photochemical activity of salts of uranium in solutions at the temperature of liquid nitrogen, Simon Freed and Kenneth M. Sancier—928
Photochemical reactions of cyclooctatetraene, Ikuzo Tanaka and Michio Okuda—1780(L)

Photographic latent image. III. Dimensional changes in silver bromide following exposure, Maurice L. Huggins —1389
Photolysis of ammonia at 1849A in a flow system, C. C. McDonald, A. Kahn, and H. E. Gunning—908
Photolysis of methyl bromide in the presence of mercury, Charles F. Boynton, Jr., and H. Austin Taylor—1929
Photolysis of mixtures of acetone-d_6 and diethyl ketone, M. H. J. Wijnen—1631(L)
Quantum yield of para-diazo N − N, dimethylaniline zinc chloride dihydrate at 3660A, Albert Baril, Jr.—1275(L)
Quenching of mercury resonance radiation. III. The total effective cross sections of some saturated compounds, B. deB. Darwent and M. K. Phibbs—110
Quenching of mercury resonance radiation. IV. Unsaturated compounds, B. deB. Darwent, M. K. Phibbs, and F. G. Hurtubise—859
Reaction of cyclohexane with mercury-6 ($^3P_1$) atoms, P. W. Beck, D. V. Kniebes, and H. E. Gunning—672
Reaction of methyl radicals with aceto- and propio-nitrile, M. H. J. Wijnen—1074
Relative abundance of HT and HTO in the atmosphere, P. Harteck—1746
Stabilization of free radicals from the decomposition of hydrazoic acid, I. L. Mador and M. C. Williams—1627(L)
Stabilization of methyl radical, I. L. Mador—1617(L)
Vacuum ultraviolet photochemistry, Part I. Nitrous oxide at 1470 A, Murray Zelikoff and Leonard M. Aschenbrand—1680
Vacuum ultraviolet photochemistry, Part II. Nitrous oxide at 1849 A, Murray Zelikoff and Leonard M. Aschenbrand—1685

Polymers

Application of the Debye-Hückel theory to polyions. Part I. The range of applicability of the Debye limiting law, H. J. G. Hayman—1234
Aspects of pair interactions for a linear array of sites, as applied to adsorption problems, Robert F. Steiner—1458(L)
Critique of a method of treating the effect of excluded volume in polymer chains, Robert J. Rubin—241
Effect of pressure on diffusion in polymer solutions, A. H. Emer, Jr., L. H. Tung, and H. G. Drickamer—961
Electronic structure of disordered one-dimensional chains, Rolf Landauer and Joseph C. Helland—1655
Experiments on polymer solution in inhomogeneous electrical fields, P. Debye, P. P. Debye, B. H. Eckstein, W. A. Barber, and G. J. Arquette—152(L)
Gamma-ray polymerization of acrylamide in the solid state, Robert B. Mesrobian, Paul Ander, David S. Ballantine, and G. J. Dienes—565(L)
Influence of rate of shear on the apparent viscosity of A—dilute polymer solutions, and B—bulk polymers, F. Bueche—1570
Interaction between two bodies immersed in a solution of macromolecules, Sho Asakura and Fumio Oosawa—1255(L)
Kinetics of phase transitions involving dimer reactions, H. L. Frisch and C. Willis—243
Light scattering of spherical colloidal particles, Wilfried Heller and William J. Pangonis—948(L)
Mean dimensions of rubber-like molecules, T. B. Grimley —1134(L)
Network theory of the gel point and the "incestuous" polymerization of diallyl phthalate, Manfred Gordon—610
Note on solutions of linear polyelectrolyte molecules, Oosawa, Fumio and Nobuhisa Imai—2084(L)
Rare gas permeation through polymers, Francis J. Norton —1145(L)
Selection rules and frequencies of the skeletal vibrations of long chain polymers in the crystalline state, C. Y. Liang, G. B. B. M. Sutherland, and S. Krimm—1468(L)
Statistical computation of mean dimensions of macromolecules, I. F. T. Wall, L. A. Hiller, Jr., and D. J. Wheeler—1036
"Steric protection" of hydrophobic colloidal particles by adsorption of flexible macromolecules, Wilfried Heller and Thomas L. Pugh—1778(L)
Surface tension of high-polymer solutions, Fumio Oosawa and Sho Asakura—1255(L)
Temperature dependence of ultrasonic velocity in plastics, S. V. Subrahmanyam—1562
Thermodynamics of alcohol-hydrocarbon mixtures, Carl B. Kretschmer and Richard Wiebe—1697
Velocity of one megacycle ultrasonic waves in benzene and toluene solutions of polystyrene, William M. Fox and George W. Hazzard—1485
Viscoelastic properties of plastics, F. Bueche—603

Proteins

Infrared evidence for collagen structures, G. B. B. M. Sutherland, K. Nolen Tanner, and D. L. Wood—1621(L)
Light scattering by tobacco mosaic virus nucleic acid, Theodore G. Northrop and Robert L. Sinsheimer—703
Separation and concentration of proteins in a pH field combined with an electric field, Alexander Kolin—1628(L)

Quantum Mechanics (see **Mechanics, Quantum**)

Radiation Chemistry

Absolute yield of the ferrous sulfate oxidation reaction, J. Weiss, W. Bernstein, and J. B. H. Kuper—1593
Backscattering from targets of low atomic number bombarded with 1-2 Mev electrons, Jerome Saldick and Augustine O. Allen—1777(L)
Chemical effects of (d,p), $(n,2n)$, and (γ,n) activation of iodine, Robert H. Schuler—2026
Decomposition of nitrogen dioxide by neutron irradiation, P. Harteck and S. Dondes—953(L)
Elementary processes in the radiation chemistry of water, Keith J. Laidler—1740
Ferrous sulfate radiation dosimeter: a calorimetric calibration with gamma rays, R. M. Lazo, H. A. Dewhurst, and Milton Burton—1370
Fluorescence and thermoluminescence of ice, Leonard I. Grossweiner and Max S. Matheson—1514
Gamma-ray polymerization of acrylamide in the solid state, Robert B. Mesrobian, Paul Ander, David S. Ballantine, and G. J. Dienes—565(L)
Ion-pair yield of the tritium-oxygen reaction, Leon M. Dorfman and B. A. Hemmer—1555
Irradiation of ferrous ammonium sulfate solutions: Energy absorption and ionization calculations for cobalt 60 and betatron radiation, D. V. Cormack, R. W. Hummel, H. E. Johns, and J. W. T. Spinks—6
Radiation chemistry of luminescent solutions, Milton Burton and W. N. Patrick—1150(L)
Radiation-induced reaction between iodine and heptane, Paul F. Forsyth, Edward N. Weber, and Robert H. Schuler—66
Radical pair yield of ionizing radiation in sulfuric acid solution, Everett R. Johnson and Jerome Weiss—752(L)
Scavenger effect in the n,γ reaction in carbon tetrachloride, William H. Hamill and Russell R. Williams, Jr.—53
Szilard-Chalmers reaction in aqueous solutions of tri- and hexavalent chromium, Lawrence M. Fishman and Garman Harbottle—1088

Radiation Chemistry (continued)
Szilard-Chalmers reaction in crystalline compounds of chromium, Garman Harbottle—1083
Szilard-Chalmers reaction on CH_3I, Tor Brustad and Johan Baarli—1311
Yield of oxidation of ferrous sulfate in acid solution by high-energy cathode rays, Jerome Saldick and Augustine O. Allen—438
Radiochemistry
Backscattering from targets of low atomic number bombarded with 1–2 Mev electrons, Jerome Saldick and Augustine O. Allen—1777(L)
Preparation and isolation of carrier-free As^{74} from germanium cyclotron targets, Mino Green and James A. Kafalas—760(L)
Radiochemical measurements of the natural fission rate of uranium, P. K. Kuroda and R. R. Edwards—1940(L)
Theory of radioactive ion exchange, E. Pitts—56
Raman Spectra
Assignment of torsional frequencies in some halogenated ethanes, Norbert W. Luft—155(L)
Assignments of the Raman and infrared frequencies of 1,2-dichloroethane observed in the gaseous, liquid, and solid states, Ichiro Nakagawa and San-Ichiro Mizushima—759(L)
Experimental study of the vibrational spectra of hexamethyldisilane and related compounds, C. C. Cerato, J. L. Lauer, and H. C. Beachell—1
Infrared and Raman spectra of carbon suboxide, H. D. Rix—429
Infrared and Raman spectra of 1,1-dimethylhydrazine and trimethylhydrazine, E. R. Shull, J. L. Wood, J. G. Aston, and D. H. Rank—1191
Infrared and Raman spectra of formaldehyde-d_1 vapor, D. W. Davidson, B. P. Stoicheff, and H. J. Bernstein—289
Raman and infrared spectra of CF_3Br and CF_3I, Walter F. Edgell and Charles E. May—1808
Raman frequency of liquid bromine, H. Stammreich and Roberto Forneris—1624(L)
Raman spectra and potential constants for CF_3Cl, CF_3Br, and CF_3I, Robert Cooper Taylor—714
Raman spectra of chlorofluoromethanes in the gaseous state, Howard H. Claassen—50
Raman spectra of 2- and 3-fluoropyridine, Harold P. Stephenson and Fred L. Voelz—1945(L)
Rule of mutual exclusion, T. Venkatarayudu—1269(L)
Structure of the perrhenate ion, Howard H. Claassen and A. J. Zielen—707
Substituted methanes. XVIII. Vibrational spectra of $C^{13}H_3I$, Richard B. Bernstein, Forrest F. Cleveland, and Fred L. Voelz—193
Substituted methanes. XX. Potential constants and calculated thermodynamic properties for some dibromomethanes, Jerome M. Dowling and Arnold G. Meister—1042
Supposed Raman spectrum of gaseous bromine, R. F. Barrow—1775(L)
s-Triazine. V. The Raman spectrum, Robert F. Stamm and John E. Lancaster—1280(L)
Vibrational assignment and thermodynamic properties of *N*-dimethylaminodiborane, D. E. Mann—762(L)
Vibrational spectra of *n*-dimethylaminodiborane, D. E. Mann—70
Vibrational spectra of molecules and complex ions in crystals VII. The Raman spectrum of crystalline ammonia and 3-deutero-ammonia, F. P. Reding and D. F. Hornig—1926
Vibrational spectrum of hexafluoro-2-butyne, Foil A. Miller and Robert P. Bauman—1544
Reaction Rates (see **Kinetics of Reaction**)
Refractive Indexes
Anomalous Faraday effect in aqueous solutions of inorganic salts, D. D. Randall and A. M. Taylor—1149(L)
Rotation
Electron scattering and internal rotation, J. Karle—1246
Magnitudes of barriers in intramolecular rotation, N. W. Luft—1814
Nuclear relaxation and quasi-crystalline structure of liquids, L. Giulotto, G. Chiarotti, and G. Cristiani—1143(L)
Rotational magnet moments of $KClFeCl_2$ and $KBrFeBr_2$, P. Kusch—1203
Rotational spectrum of PH_3, Harald H. Nielsen—1383
Second-order quadrupole effects in asymmetric tops. The microwave spectrum of vinyl iodide, H. W. Morgan and J. H. Goldstein—1427
Theory of the interaction of hindered internal rotation with over-all rotations. I. Symmetric rotors: Methyl silane, Daniel Kivelson—1733
Rotational Isomerism
Energy difference of the two rotational isomers of 1,2-dichloroethane in various solutions, Akiyoshi Wada and Yonezo Morino—1276(L)
Further evidence for the existence of the gauche-form of 1,2-dichloroethane, San-Ichiro Mizushima, Ichiro Nakagawa, Isao Ichishima, and Tatsuo Miyazawa—1614(L)
Influence of solvent upon the energy difference between rotational isomers, Akiyoshi Wada—198
Infrared absorption investigation on the rotational isomerism of 1,1,2-trichloroethane, Kenji Kuratani and San-Ichiro Mizushima—1403
Investigation of rotational isomers with ultrasound, John Karpovich—1767
Molecular structure of 1,1,2,2-tetrafluorodichloroethane, M. Iwasaki, S. Nagase, and R. Kojima—959(L)
Structure and internal motion of hexachloroethane, D. A. Swick, I. L. Karle, and J. Karle—1242

Scattering
Scattering of high-velocity neutral particles. II. Helium-helium, I. Amdur and A. L. Harkness—664
Scattering of high-velocity neutral particles. III. Argon-argon, I. Amdur and E. A. Mason—670
Scattering of high-velocity neutral particles. IV. He − A; A − He, I. Amdur, E. A. Mason, and A. L. Harkness—1071
Sedimentation
Sedimentation potential and velocity of solid spherical particles, F. Booth—1956
Semiconductors
Charge-transfer-no-bond adsorption, F. A. Matsen, A. C. Makrides, and N. Hackerman—1800
Electrical properties of some complex compounds. Part I, P. E. Fielding—1153
Electrical properties of some complex compounds. Part 2, P. E. Fielding and D. P. Mellor—1155
Electronic structure, infrared absorption, and Hall effect in tellurium, Herbert B. Callen—518
Occurrence of natural *p*–*n* junctions in lead solenide, Arthur E. Goldberg and George R. Mitchell—220
Solutions (see also **Liquids**)
Anomalous Faraday effect in aqueous solutions of inorganic salts, D. D. Randall and A. M. Taylor—1149(L)
Application of the Debye-Hückel theory to polyions. Part I. The range of applicability of the Debye limiting law, H. J. G. Hayman—1234
$BaTiO_3$-KF phase diagram, Clarence Karan—957(L)
Conductivity of supercritical solutions of sodium chloride and water, James T. Corwin and Gwilym E. Owen—1257(L)

Critical phenomena in the cyclohexane-aniline system, Douglas Atack and O. K. Rice—382
Determination of concentrations in the ultracentrifugation of two-component systems. R. Trautman, V. N. Schumaker, W. F. Harrington, and H. K. Schachman—555
Effect of pressure on diffusion in polymer solutions, A. H. Emer, Jr., L. H. Tung, and H. G. Drickamer—961
Electrical conductivity of supercritical solutions of sodium chloride and water, James K. Fogo, Sidney W. Benson, and Charles S. Copeland—212
Energy difference in the two rotational isomers of 1,2-dichloroethane in various solutions, Akiyoshi Wada and Yonezo Morino—1276(L)
Entropies of complex ions in aqueous solution, P. George, G. I. H. Hanania, and D. H. Irvine—1616(L)
Excess heats and volumes of mixing, P. Meares—955(L)
Experiments on polymer solution in inhomogeneous electrical fields, P. Debye, P. P. Debye, B. H. Eckstein, W. A. Barber, and G. J. Arquette—152(L)
Explanation of certain types of curves found in high-frequency techniques, H. W. Hamme, E. L. Grove, and J. L. Kassner—944(L)
Generalization of the radial dilution square law in ultracentrifugation, Rodes Trautman and Verne Schumaker—551
Hyperfine splittings in polyatomic free radicals, S. I. Weissman—1378
Influence of rate of shear on the apparent viscosity of A—dilute polymer solutions, and B—bulk polymers, F. Bueche—1570
Infrared absorption studies on aqueous complex ions: I. Cyanide complexes of Ag(I) and Au(I) in aqueous solution and adsorbed on anion resin, Llewellyn H. Jones and Robert A. Penneman—965
Infrared spectrum and thermodynamic functions of formamide, J. C. Evans—1128
Infrared studies of solutions involving aromatics and halogens, Wolfgang Haller, George Jura, and George C. Pimentel—720
Infrared study of the effect of solvent upon ν(NH) in pyrrole, Marie-Louise Josien and Nelson Fuson—1169
Ionization of strong electrolytes. III. Proton magnetic resonance in nitric, perchloric, and hydrochloric acids, G. C. Hood, O. Redlich, and C. A. Reilly—2067
Liquid system ozone-oxygen, A. C. Jenkins and C. M. Birdsall—1779(L)
Magnetic behavior of the system CoO—MgO at elevated temperatures, Norman Elliott—1924
New analysis of the effect of polar solvents upon ν(NH) of pyrrole, Marie-Louise Josien and Nelson Fuson—1264(L)
Note on solutions of linear polyelectrolyte molecules, Oosawa, Fumio and Nobuhisa Imai—2084(L)
Note on the temperature variation of the configurational energy of regular solutions, P. K. Katti and S. M. Bhagat—1951(L)
Oxidation ions in hydrocarbons on ultraviolet irradiation, Andrew Gemant—1705
Partial molal volumes of hydrocarbons in water solution, W. L. Masterton—1830
Photochemical activity of salts of uranium in solutions at the temperature of liquid nitrogen, Simon Freed and Kenneth M. Sancier—928
Polar solvent effects on the absorption spectra of metallic complexes, Kazuo Nakamoto, Masahisa Kobayashi, and Ryutaro Tsuchida—957(L)
Polymorphism in solution of *cis*- and *trans*-β-methoxy-*p*-nitrochalcone, Yoshiyuki Urushibara, Fujiro Iimura, and Kenro Ikeda—1943(L)
Proton magnetic resonance and structure of ammonium hydroxide, H. S. Gutowsky and S. Fujiwara—1782(L)
Proton magnetic resonance spectrum of ammonia, and the interaction involved in hydrogen bond association, Richard A. Ogg, Jr.—560
Proton relaxation in Mn^{++} aqueous solutions, John R. Zimmerman—950(L)
Rate constant of the reaction between hydrogen peroxide and ferrous ions, Tyson Rigg, William Taylor, and Joseph Weiss—575
Rectilinear diameter law of mole fractions for binary liquid-vapor coexistence regions near the critical locus, Sidney W. Benson, Peter E. M. Allen, and Charles S. Copeland—247
Rotation in solid mixtures of neohexane and cyclopentane from 20°K to their melting points, J. G. Aston, Bouwe Bolger, Ralph Trambarulo, and H. Segall—460
Separation and concentration of proteins in a *p*H field combined with an electric field, Alexander Kolin—1628(L)
Statistical thermodynamics of associated solutions, J. A. Barker and F. Smith—375
Structure of the perrhenate ion, H. H. Claassen and A. J. Zielen—707
Surface tension of high-polymer solutions, Fumio Oosawa and Sho Asakura—1255(L)
Szilard-Chalmers reaction in aqueous solutions of tri- and hexavalent chromium, Lawrence M. Fishman and Garman Harbottle—1088
Temperature dependence of the ultraviolet absorption spectrum of naphthalene in solution, Riccardo Passerini and Ian G. Ross—1012
Thermal diffusion in binary mixtures of CS_2 and hexane isomers, W. M. Rutherford, E. L. Dougherty, and H. G. Drickamer—1289
Thermodynamics of alcohol-hydrocarbon mixtures, Carl B. Kretschmer and Richard Wiebe—1697
Thermodynamics of equilibrium in the ultracentrifuge, T. Fraser Young, Kurt A. Kraus, and James S. Johnson—878
Velocity of one megacycle ultrasonic waves in benzene and toluene solutions of polystyrene, William M. Fox and George W. Hazzard—1485
Velocity of sound in hydrazine-water mixtures at 500 kilocycles, George G. Kretschmar—753(L)
Virial expansion of the osmotic pressure in the Donnan membrane equilibrium, Terrell L. Hill—1251
Viscoelastic properties of plastics, F. Bueche—603
Yield of oxidation of ferrous sulfate in acid solution by high-energy cathode rays, Jerome Saldick and Augustine O. Allen—438

Spectra (see **Absorption Spectra, Emission Spectra, Fluorescence, Raman Spectra**)

Statistical Mechanics (see **Mechanics, Statistical**)

Surface Phenomena

Absorption spectra of monomolecular layers of chlorophyll α and ethyl chlorophyllide α, Earl E. Jacobs, A. Stanley Holt, and Eugene Rabinowitch—142(L)
Adsorption of carbon dioxide on nickel single crystal surfaces using a radiotracer technique, J. A. Dillon, Jr. and H. E. Farnsworth—1601
Adsorption studies on clay minerals. IV. The system montmorillonite-cesium-potassium, Joseph A. Faucher and Henry C. Thomas—258
Aspects of pair interactions for a linear array of sites, as applied to adsorption problems, Robert F. Steiner—1458(L)
Calculation of the concentration of atomic hydrogen at a cathode. II, J. O'M. Bockris and Roger Parsons—1774(L)

Surface Phenomena (continued)
Calculation of the concentration of atomic hydrogen at a cathode. II, Hugh W. Salzberg and Sigmund Schuldiner —1774(L)
Charge-transfer-no-bond adsorption, F. A. Matsen, A. C. Makrides, and N. Hackerman—1800
Comparative study of accommodation coefficients by the temperature jump and low-pressure methods and thermal conductivities of He, Ne, and CO_2, Lloyd B. Thomas and Ralph C. Golike—300
Conversion of *ortho-* to *para*-hydrogen in the liquid phase, G. L. Squires and A. T. Stewart—754(L)
Determination of adsorption energy heterogeneity of solid surfaces, Jurgen M. Honig and Edward L. Hill—851
Diffusion effects in the photochemistry of solid films, Joseph E. Wilson—334
Effect of oxygen on the photoconductivity of anthracene. II, A. G. Chynoweth—1029
Exact solution of the Debye-Hückel equations for a polarized electrode, J. Ross Macdonald and Malcolm K. Brachman—1314
Fractionation of oxygen isotopes during the formation of metal oxide films, Malcolm Dole and G. A. Lane—949(L)
Frequency of the irradiating light as a determinant of the Joshi effect in oxygen under silent electric discharge, S. R. Mohanty—1010
Homogeneous activation of molecular hydrogen by cupric acetate, J. Halpern and R. G. Dakers—1272(L)
Infrared spectra of chemisorbed carbon monoxide, R. P. Eischens, W. A. Pliskin, and S. A. Francis—1786(L)
Interaction of rare gas atoms with surfaces, W. A. Steele and G. D. Halsey, Jr.—979
Ion-exchange and adsorption column kinetic with uniform partial presaturation, Theodore Vermeulen and Nevin K. Hiester—96
Ionic components of charge in the electrical double layer, David C. Grahame and Barbara A. Soderberg—449
Kinetics of the exchange processes in ion exchangers, Lennart W. Holm—1132(L)
Mass spectrometric analysis of ions from the field microscope, Mark G. Inghram and Robert Gomer—1279(L)
Multilayer adsorption of water near saturation pressure on plane glass surfaces, U. Garbatski and M. Folman—2086(L)
Note on the flow of gases through very fine tubes, G. W. Sears—1252
Photochemical reactions of cyclooctatetraene, Ikuzo Tanaka and Michio Okuda—1780(L)
Photon-induced diffusion in thin films and single crystals of potassium iodide, C. J. Delbecq and P. H. Yuster —921
Quantum-mechanical calculation of the surface energy of crystalline lithium fluoride, B. M. E. van der Hoff and G. C. Benson—475
Random walk with semiadsorbing barrier, Frank C. Goodrich—588
Rates of formation of different deuteroethylenes and deuteroethanes in the reaction of ethylene and deuterium, Tominaga Keii—144(L)
Reduction of SrO by methane, George E. Moore, H. W. Allison, and K. B. Wolfstirn—726
Static space-charge effects in the diffuse double layer, J. Ross Macdonald—1317
Statistical derivation of the B.E.T. equation, Tominaga Keii—1617(L)
"Steric protection" of hydrophobic colloidal particles by adsorption of flexible macromolecules, Wilfried Heller and Thomas L. Pugh—1778(L)
Surface migration of carbon on tungsten, Ralph Klein—1406
Surface tension of high-polymer solutions, Fumio Oosawa and Sho Asakura—1255(L)
Theory of the differential capacitance of the double layer in unadsorbed electrolytes, James Ross Macdonald—1857
Thermodynamics of adsorption, Ralph J. Tykodi—1647
Van Der Waals adsorption as a determinant of Joshi effect, N. A. Ramaian—1507
Vibrational spectra and structure of solid hydroxylamine and deuterohydroxylamine, R. E. Nightingale and E. L. Wagner—203

Thermal Diffusion
Effect of pressure on thermal diffusion in *n*-paraffin hydrocarbon-CS_2 mixtures, W. M. Rutherford and H. G. Drickamer—1284
Theory of thermal diffusion in liquids and the use of pressure to investigate the theory, W. M. Rutherford and H. G. Drickamer—1157
Thermal diffusion in binary liquid mixtures of molecules of simple symmetry, R. L. Saxton, E. L. Dougherty, and H. G. Drickamer—1166
Thermal diffusion in binary mixtures of CS_2 and hexane isomers, W. M. Rutherford, E. L. Dougherty, and H. G. Drickamer—1289
Thermal diffusion in mixtures of tetrachloroethane with normal paraffin hydrocarbons, R. L. Saxton and H. G. Drickamer—1287
Thermal diffusion in the liquid phase, J. Jenner and G. Thomaes—566(L)

Thermodynamic Properties
Adsorption studies on clay minerals. IV. The system montmorillonite-cesium-potassium, Joseph A. Faucher and Henry C. Thomas—258
Assignment of torsional frequencies in some halogenated ethanes, Norbert W. Luft—155(L)
$BaTiO_3$-KF phase diagram, Clarence Karan—957(L)
Benzyl-hydrogen bond dissociation energy from electron impact measurements, D. O. Schissler and D. P. Stevenson—151(L)
Benzyl-hydrogen bond dissociation energy, J. B. Farmer, I. H. S. Henderson, C. A. McDowell, and F. P. Lossing —1948(L)
Bromination of hydrocarbons. VII. Bromination of isobutane. Bond dissociation energies from bromination kinetics, Bernard H. Eckstein, Harold A. Scheraga, and Ervin R. Van Artsdalen—28
Calculation of equilibrium constants for several exchange reactions of nitrogen-15 between oxy compounds of nitrogen, W. Spindel—1271(L)
Calculation of the fraction of effusing molecules which strike a collector plate above a channel hole, Robert D. Freeman and Alan W. Searcy—1137(L)
Carbon-carbon bond dissociation energies in the cycloalkanes, Frank H. Seubold, Jr.—945(L)
C—C bond dissociation energies in cyclanes, H. O. Pritchard and A. F. Trotman-Dickenson—944(L)
Comparative study of accommodation coefficients by the temperature jump and low-pressure methods and thermal conductivities of He, Ne, and CO_2, Lloyd B. Thomas and Ralph C. Golike—300
Concerning the coexistant phases in the system NaCl $-H_2O$ above 374°C, James Fogo, Sidney W. Benson, and Charles S. Copeland—1942(L)
Correlation between infrared intensities, dissociation energies and equilibrium internuclear distances for diatomic molecules, Henry Aroeste—1273(L)
Critical phenomena in the cyclohexane-aniline system, Douglas Atack and O. K. Rice—382

Critical temperature and boiling point of normal paraffins, Shashanka Shekhar Mitra—156(L)
Critical temperature and pressure of *n*-paraffins, L. Grunberg—157(L)
Critical temperatures of normal paraffins, Y. P. Varshni and S. N. Srivastava—349(L)
Dependence of surface tension on temperature, Shashanka Shekhar Mitra—1134(L)
Direct determination of the heat of sublimation of carbon, William A. Chupka and Mark G. Inghram—1472(L)
Dissociation energy of fluorine, R. T. Sanderson—345(L)
Dissociation energy of N_2, J. M. Hendrie—1503
Effect of channel holes on the force exerted by effusing vapors, Robert D. Freeman and Alan W. Searcy—762(L)
Entropies of complex ions in aqueous solution, P. George, G. I. H. Hanania, and D. H. Irvine—1616(L)
Equilibria in the formation of molybdenum and thorium iodides from the elements, Thomas L. Allen and Don M. Yost—855
Equilibrium constant, infrared spectrum, and thermodynamic properties of bromine chloride, H. C. Mattraw, C. F. Pachucki, and N. J. Hawkins—1117
Excess heats and volumes of mixing, P. Meares—955(L)
Force constants for F_2CO and thermodynamic properties for F_2CO and FClCO, R. J. Lovell, C. V. Stephenson, and E. A. Jones—1953
Frequency spectrum and specific heat of a face-centered cubic lattice. I, Carl W. Garland and George Jura—1108
Hafnium silicides, Benjamin Post, Frank W. Glaser, and David Moskowitz—1264(L)
Heat of formation of CF_3 and some bond dissociation energies for fluorocarbons, B. S. Rabinovitch and J. F. Reed—2092(L)
Heat of formation of NH(g) and the bond dissociation energy D(NH—H), Aubrey P. Altshuller—1947(L)
Heat of sublimation of graphite and the composition of carbon vapor, George Glocker—159
Heats of combustion and formation of some alcohols, phenols, and ketones, George S. Parks, Kenneth E. Manchester, and Leland M. Vaughan—2089(L)
Heats of combustion and formation of some methoxypolysilane and -polysiloxane: Si—O bond energy, Toshio Tanaka and Takeo Watase—1268(L)
Heats of sublimation and evaporation of germanium, Richard E. Honig—1610(L)
Heterogeneous nucleation of crystals from vapor, G. M. Pound, M. T. Simnad, and Ling Yang—1215
High-speed machine computation of ideal gas thermodynamic functions. I. The isotopic water molecules, Abraham S. Friedman and Lester Haar—2051
Hydrogen bonding in sodium trifluoroacetate-trifluoroacetic acid compounds, William Klemperer and George C. Pimentel—1399
Infrared absorption studies on aqueous complex ions: I. Cyanide complexes of Ag(I) and Au(I) in aqueous solution and adsorbed on anion resin, Llewellyn H. Jones and Robert A. Penneman—965
Infrared spectra of monochlorogermane and monochlorogermane-d_3, R. C. Lord and C. M. Steese—542
Infrared spectrum and thermodynamic functions of formamide, J. C. Evans—1228
Infrared spectrum of ketene, Børge Bak and F. Allan Andersen—1050
Ionic components of charge in the electrical double layer, David C. Grahame and Barbara A. Soderberg—449
Lattice energies of copper subgroup and thallous halides, Aubrey P. Altshuller—1136(L)
Lattice vibration specific heat of graphite, Takeo Nagamiya and Kozo Komatsu—1457(L)
Liberational heat capacity of ice and of heavy ice, R. W. Blue—280
Liquid system ozone-oxygen, A. C. Jenkins and C. M. Birdsall—1779(L)
Mass spectrometric study of the molecular sublimation of graphite, Richard E. Honig—126
Occurrence of natural p—n junctions in lead solenide, Arthur H. Goldberg and George R. Mitchell—220
Partial molal volumes of hydrocarbons in water solution, W. L. Masterton—1830
Polar *versus* nonpolar ice, R. E. Rundle—344(L)
Rectilinear diameter law of mole fractions for binary liquid-vapor coexistence regions near the critical locus, Sidney W. Benson, Peter E. M. Allen, and Charles S. Copeland—247
Relation between vapor pressure and viscosity of liquids, Shashanka Shekhar Mitra—349(L)
Residual entropy of the polar structure of ice, William N. Lipscomb—344(L)
Schlieren studies of the critical region, Howard B. Palmer—625
Stability of metallo-organic compounds. II, H. H. Jaffé—1462(L)
Sublimation studies of silicon in the mass spectrometer, Richard E. Honig—1610(L)
Substituted methanes. XX. Potential constants and calculated thermodynamic properties for some dibromomethanes, Jerome M. Dowling and Arnold C. Meister—1042
Substituted methanes. XXIV. Potential constants for CCl_2F_2, Jerome M. Dowling—1789(L)
Theory of ignition considered as a thermal reaction, Bruce L. Hicks—414
Thermal conductivity of organic vapors. The relationship between thermal conductivity and viscosity, and the significance of the Eucken factor, R. G. Vines and L. A. Bennett—360
Thermodynamic and spectroscopic study of gaseous magnesium oxide, Leo Brewer and Richard F. Porter—1867
Thermodynamic functions for borine carbonyl, H. J. Galbraith—1461(L)
Thermodynamic functions of hydrogen isocyanate, Norbert W. Luft and Om P. Kharbanda—956(L)
Thermodynamic properties of gaseous titanium, Harwood G. Kolsky and Paul W. Gilles—232
Thermodynamics of alcohol-hydrocarbon mixtures, Carl B. Kretschmer and Richard Wiebe—1697
Thermodynamics of boron nitride; low-temperature heat capacity and entropy; heats of combustion and formation, A. S. Dworkin, D. J. Sasmor, and E. R. Van Artsdalen—837
Thermodynamics of the hydrogenation of benzene, George J. Janz—751(L)
Triple point temperature of nitrogen trifluoride (66.37°K) as a possible fixed point, Louis Pierce and E. L. Pace—1271(L)
Vapor pressure and viscosity of liquids, Shashanka Shekhar Mitra and Dhirendra Nath Chakravarty—1775(L)
Vapor pressure of uranium, Everett G. Rauh and Robert J. Thorn—1414
Vapor pressure of zinc between 150° and 350°C, John D. McKinley, Jr., and John E. Vance—1120
Vibrational assignment and thermodynamic properties of *N*-dimethylaminodiborane, D. E. Mann—762(L)
Vibrational spectra and calculated thermodynamic properties of ethyl chloride and 1,1-dichloroethane, Lester W. Daasch, C. Y. Liang, and J. Rud Nielsen—1293
Vibrational spectra of trifluoroethylene and trifluoroethylene-d_1, D. E. Mann, N. Acquista, and E. K. Plyler—1586
Vibrational spectrum and the specific heat of germanium and silicon, Yu-Chang Hsieh—306

Thermodynamic Properties (continued)
Vibrational spectrum of bromotrifluoroethylene, D. E. Mann, N. Acquista, and Earle K. Plyler—1199
Thermodynamics
Chemical kinetics and equilibrium. The law of integral powers in kinetics, J. A. Christiansen—1612(L)
Contributions of vibrational anharmonicity and rotation-vibration interaction to thermodynamic functions, R. E. Pennington and K. A. Kobe—1442
Critical point and the phase rule, Johan van Dranen—1265(L)
Critical temperature and pressure of normal paraffins, Yatendra Pal Varshni—1629(L)
Derivations of Onsager's reciprocal relations, Eugene P. Wigner—1912
Deviations from additivity of the intermolecular field at high densities, Laurens Jansen and Zaka I. Slawsky—1701
Fermi level, chemical potential, and Gibbs free energy, Malcolm K. Brachman—1152(L)
Frequency spectrum and specific heat of a face-centered cubic lattice. I, Carl W. Garland and George Jura—1108
Frequency spectrum and specific heat of a face-centered cubic lattice. II. Low-temperature region, Carl W. Garland and George Jura—1114
Ionic components of charge in the electrical double layer, David C. Grahame and Barbara A. Soderberg—449
Lattice dynamics of body-centered and face-centered cubic metallic elements. II, Jules de Launay—1676
Note on the temperature variation of the configurational energy of regular solutions, P. K. Katti and S. M. Bhagat—1951(L)
Onsager thermodynamics of galvanic cells with liquid-liquid junctions, Richard J. Bearman—585
Order-disorder phenomena, Bruno Linder—970
Quantum-mechanical calculation of the surface energy of crystalline lithium fluoride, B. M. E. van der Hoff and G. C. Benson—475
Reply to Christiansen's letter, 'chemical kinetics and equilibrium,' Milton Manes, L. J. E. Hofer, and Sol Weller—1612(L)
Specific heats of single solids and moments of elastic frequency spectra, Jenn-Lin Hwang—154(L)
Statistical thermodynamics of associated solutions, J. A. Barker and F. Smith—375
Successive orientational transitions in crystals, Theodore J. Krieger and Hubert M. James—796
Theory of thermal diffusion in liquids and the use of pressure to investigate the theory, W. M. Rutherford and H. G. Drickamer—1157
Thermodynamic temperature scale below 90°K the normal boiling point of normal hydrogen, G. W. Moessen, J. G. Aston, and R. G. Ascah—2096(L)
Thermodynamics of adsorption, Ralph J. Tykodi—1647
Thermodynamics of equilibrium in the ultracentrifuge, T. Fraser Young, Kurt A. Kraus, and James S. Johnson—878
Thermodynamics of phase transitions in compressible solid lattices, O. K. Rice—1535
Vector representation of chemical affinities, C. A. Hollingsworth and Robert L. Potter—761(L)
Transport Phenomena
Approximate treatment of the viscosity of idealized liquids. I. The collisional contribution, F. C. Collins and H. Raffel—1728
Deviations from additivity of the intermolecular field at high densities, Laurens Jansen and Zaka I. Slawsky—1701
Intermolecular potentials for some simple nonpolar molecules, E. A. Mason and W. E. Rice—843
Intermolecular potentials of helium and hydrogen, Edward A. Mason and William E. Rice—522
Markoff random processes and the statistical mechanics of time-dependent phenomena. II. Irreversible processes in fluids, Medville S. Green—398
Rotational energy transfer in H_2, Robert Brout—934
Scattering of high-velocity neutral particles. II. Helium-helium, I. Amdur and A. L. Harkness—664
Scattering of high-velocity neutral particles. III. Argon-argon, I. Amdur and E. A. Mason—670
Shock tube measurements of vibrational relaxation, Edward F. Smiley and Ernst H. Winkler—2018
Solution of the Boltzmann equation for a shock wave using a restricted variational principle, Phillip Rosen—1045
Statistical mechanical theory of transport processes. VII. The coefficient of thermal conductivity of monatomic liquids, Robert W. Zwanzig, John G. Kirkwood, Irwin Oppenheim, and Berni J. Alder—783
Statistical-mechanical theory of transport processes. VIII. Quantum theory of transport in gases, John Ross and John G. Kirkwood—1094
Thermal conductivity of organic vapors. The relationship between thermal conductivity and viscosity, and the significance of the Eucken factor, R. G. Vines and L. A. Bennett—360
Transport properties of gases obeying a modified Buckingham (exp-six) potential, William E. Rice and Joseph O. Hirschfelder—187
Vibrational relaxation times in gases (three-dimensional treatment), Robert N. Schwartz and Karl F. Herzfeld—767
Ultrasonics
Elastic constants of gels, M. Krishnamurthi and G. Sivarama Sastry—1133(L)
Investigation of rotational isomers with ultrasound, John Karpovich—1767
Rotational energy transfer in H_2, Robert Brout—934
Temperature dependence of ultrasonic velocity in plastics, S. V. Subrahmanyam—1562
Ultrasonic propagation and its relation to molecular structure in the diols, T. A. Litovitz, R. Higgs, and R. Meister—1281
Velocity of one megacycle ultrasonic waves in benzene and toluene solutions of polystyrene, William M. Fox and George W. Hazzard—1485
Velocity of sound in hydrazine-water mixtures at 500 kilocycles, George G. Kretschmar—753(L)
Velocity of sound in water as a function of temperature and pressure, A. H. Smith and A. W. Lawson—351
Valence and Chemical Bond
Approximate integral evaluations used in the molecular quantum mechanics of non-linear molecules, Roland S. Barker and Henry Eyring—2072
Approximation of molecular orbitals in diatomic molecules by diatomic orbitals, Richard F. Wallis and Hugh M. Hulburt—774
Benzyl-hydrogen bond dissociation energy, J. B. Farmer, I. H. S. Henderson, C. A. McDowell, and F. P. Lossing—1948(L)
Benzyl-hydrogen bond dissociation energy from electron impact measurements, D. O. Schissler and D. P. Stevenson—151(L)
Box model and electron densities in conjugated systems, John R. Platt—1448
Bromine nuclear quadrupole resonances, P. J. Bray—950(L)
Covalent boron-boron bonds in crystals of certain metal borides, Inga Fischer-Hjalmars and Stig Flodmark—1950(L)

Crystal and molecular structure of B_5H_{11}, Louis R. Lavine and William N. Lipscomb—614
Deductions about hybridization from nuclear quadrupole coupling constants, Paul N. Schatz—755(L)
Delta potential function model for electronic energies in molecules, Arthur A. Frost—1613(L)
Deuterium effect on hydrogen bond distances in hafnium dihydride, S. S. Sidhu—1062
Development of a quantum-mechanical model for the lithium fluoride molecule, G. C. Benson and B. M. E. van der Hoff—469
Dichroism of the crystal of dicyclopentadienyl-iron, Shoichiro Yamada, Akitsugu Nakahara, and Ryutaro Tsuchida—1620(L)
Dipole moments, nuclear quadrupole coupling, and the bonding orbitals in group V-trihalides, Paul Kisliuk—86
Double bond character of conjugated carbon-chlorine bonds, R. Bersohn—2078
Electron distribution in molecules. IV. Phosphorus magnetic resonance shifts, H. S. Gotowsky and D. W. McCall—162
Electronic structures of the CH radical, Jiro Higuchi—1339
Evaluation of some electron repulsion integrals needed in molecular quantum mechanics. A method of calculation of two electron multi-center repulsion integrals without the use of the Neumann expansion, Roland S. Barker and Henry Eyring—1177
Evaluation of some electron repulsion integrals needed in molecular quantum mechanics. II. Use of the Neumann expansion in evaluation of two electron three-center repulsion integrals, Roland S. Barker and Henry Eyring—114
Exchange energy of electrons in metals and ionic crystals, John R. Reitz—595
Force constants of the halides of the III and IV group elements, Shashanka Shekhar Mitra—2097(L)
Force constants of the hydrides of the second and third periods, S. S. Mitra and Y. P. Varshni—1269(L)
Free-electron network model for conjugated systems. V. Energies and electron distributions in the FE MO model and in the LCAO MO model, Klaus Ruedenberg—1878
Geometry of VIX_4 molecules, Felix Lachman—1459(L)
Ground and excited electronic states of phosgene, Jules Duchesne—1464(L)
Heat of formation of CF_3 and some bond dissociation energies for fluorocarbons, B. S. Rabinovitch and J. F. Reed—2092(L)
Heat of formation of $NH(g)$ and the bond dissociation energy $D(NH-H)$, Aubrey P. Altshuller—1947(L)
Heats of combustion and formation of some methoxypolysilane and -polysiloxane: Si—O bond energy, Toshio Tanaka and Takeo Watase—1268(L)
Hybridization and ionic character in CH_3Cl, Paul N. Schatz—1974
Hybridization and ionic character in the hydrogen chloride molecule, Paul N. Schatz—695
Hydrogen bonding in sodium trifluoroacetate-trifluoroacetic acid compounds, William Klemperer and George C. Pimentel—1399
Influence of intramolecular repulsion on bond energies, Norbert W. Luft—1260(L)
Infrared band of a molecular complex between hydrogen fluoride and chlorine trifluoride, J. Paul Pemsler and D. F. Smith—1834
Infrared reflection spectra of phosphate and arsenate crystals, George M. Murphy, George Weiner, and John J. Oberly—1322
Infrared spectra of chemisorbed carbon monoxide, R. P. Eischens, W. A. Pliskin, and S. A. Francis—1786(L)
Infrared spectrum and hydrogen bonding of pyrrole, P. Tuomikoski—2096(L)
Infrared spectrum of crystalline nitrogen pentoxide, Roy Ternaishi, and J. C. Decius—896
Infrared study of the effect of solvent upon ν(NH) in pyrrole, Marie-Louise Josien and N. Fusan—1169
Ionicity of gaseous thallous chloride, Aubrey P. Altshuller—573(L)
Ionization potentials and electronic structures of methyl and ethyl fluoride, C. A. McDowell and B. C. Cox—946(L)
Magnetic moments of some octahedral complexes of iridium, Eric N. Sloth and Clifford S. Garner—2064
Magnetic susceptibilities of K_3MoCl_6 and $RuCl_3$, Charles Epstein and Norman Elliott—634
Microwave spectra and structures of methyl mercury chloride and bromide, Walter Gordy and John Sheridan—92
Microwave spectrum of vinyl iodide, C. D. Cornwell and R. L. Poynter—1257(L)
Modification of the naive MO method, Lionel Goodman and Harrison Shull—1138(L)
Modified atomic orbital method with its application to ethylene and oxygen, Kimio Ohno and Takashi Itoh—1267(L)
Nonequivalent zinc bonds in chalcophanite, D. P. Craig and A. D. Wadsley—346(L)
Note on the fluorine resonance shifts, A. Saika and C. P. Slichter—26
Note on the theory of directed valence, Ta-You Wu—1125
Nuclear magnetic resonance spectra and structure of borohydride ion and diborane, Richard A. Ogg, Jr.—1933
Nuclear quadrupole couplings in solid bromides and iodides, Hugh Robinson, H. G. Dehmelt, and Walter Gordy—511
Nuclear quadrupole resonance in ethyl chloroformate and ethyl trichloroacetate, T. L. Weatherly and Quitman Williams—958(L)
Nuclear quadrupole resonances in solid bromine in iodine compounds, A. L. Schawlow—1211
Paramagnetic resonance in phthalocyanine, chlorophyll, and haemoglobin derivatives, D. J. E. Ingram and J. E. Bennett—1136(L)
Paramagnetic resonance spectra of Wurster's free radical ions, S. I. Weissman—1135(L)
Polar solvent effects on the absorption spectra of metallic complexes, Kazuo Nakamoto, Masahisa Kobayashi, and Ryutaro Tsuchida—957(L)
Proton magnetic resonance spectrum of ammonia, and the interaction involved in hydrogen bond association, Richard A. Ogg, Jr.—560
Pure quadrupole spectra of metal bromates, Kenji Shimomura, Toshimoto Kushida, Noriyoshi Inoue, and Yoshiro Imaeda—1944(L)
Pure quadrupole spectra of solid bromine and iodine compounds, Kenji Shimomura, Toshimoto Kushida, Noriyoshi Inoue, and Yoshiro Imaeda—350(L)
Pure quadrupole spectrum of solid hexachlorobenzene and its interpretation, Jules Duchesne and André Monfils—562(L)
Quantum-mechanical study of the fluorine molecule, Hans Dinger and Inga Fischer-Hjalmars—346(L)
Quantum-mechanical treatment of the symmetrical hydrogen bridge, A. N. Baker, Jr.—1625(L)
Quenching of mercury resonance radiation. IV. Unsaturated compounds, B. deB. Darwent, M. K. Phibbs, and F. G. Hurtubise—859
Relation of nuclear quadrupole couplings to the chemical bond, Walter Gordy—1470(L)

Valence and Chemical Bond (continued)
Semiempirical potential energy functions. I. The H_2 and H_2^+ diatomic molecules, Arthur A. Frost and Boris Musulin—1017
Semiempirical treatment of $n-\pi$ transitions, Lionel Goodman and Harrison Shull—1138(L)
"Smoothed potential" theory of chemical binding, James R. Arnold—757(L)
Stability of metallo-organic compounds. II, H. H. Jaffe —1462(L)
Structure for collagen, F. H. C. Crick—347(L)
Structure of the nitric oxide dimer, W. J. Orville-Thomas —1267(L)
Structures of the boron hydrides, William N. Lipscomb—985
Symbolic structural formulas for boron hydrides, John R. Platt—1033
Unified orbital treatment of ethylene, C. R. Mueller—120
United atom-separated atom treatment of H_2^+, J. R. Streetman and F. A. Matsen—1366
Use of electron repulsion integral approximations in molecular quantum mechanics, Roland S. Barker, Henry Eyring, Charles J. Thorne, and Don A. Baker—699
Use of nuclear attraction integral approximations in molecular quantum mechanics, Roland S. Barker and Henry Eyring—1182
Valence structure of the boron hydrides, W. H. Eberhardt, Bryce Crawford, Jr., and William N. Lipscomb —989

Viscosity
Activation energy for viscous flow and Sutherland's constant, C. J. G. Raw—1946(L)
Approximate treatment of the viscosity of idealized liquids. I. The collisional contribution, F. C. Collins and H. Raffel—1728
Gamma-ray polymerization of acrylamide in the solid state, Robert B. Mesrobian, Paul Ander, David S. Ballantine, and G. J. Dienes—565(L)
Influence of rate of shear on the apparent viscosity of A—dilute polymer solutions, and B—bulk polymers, F. Bueche—1570
Intermolecular potentials for some simple nonpolar molecules, Edward A. Mason and William E. Rice—843
Intermolecular potentials of helium and hydrogen, Edward A. Mason and William E. Rice—522
Markoff random processes and the statistical mechanics of time-dependent phenomena. II. Irreversible processes in fluids, Medville S. Green—398
Microwave absorption in the mixture (phenyl isothiocyanate+diethylamine), P. K. Kadaba—1465(L)
Relation between the activation energy for viscous flow and the Lennard-Jones (12,6) potential parameter, ϵ/k, C. J. G. Raw—1627(L)
Relation between vapor pressure and viscosity of liquids, Shashanka Shekhar Mitra—349(L)
Studies of evaporation of small drops, Louis Monchick and Howard Reiss—831
Ultrasonic propagation and its relation to molecular structure in the diols, T. A. Litovitz, R. Higgs, and R. Meister—1281
Vapor pressure and viscosity of liquids, Shashanka Shekhar Mitra and Dhirendra Nath Chakravarty—1775(L)
Vibrational relaxation times in gases (three-dimensional treatment), Robert N. Schwartz and Karl F. Herzfeld —767

X-Ray Diffraction
Boron arrangement in a B_6 hydride, K. Eriks, William N. Lipscomb, and Riley Schaeffer—754(L)
Cation distribution and g factors of certain spinels containing Ni^{++}, Mn^{++}, Co^{++}, Al^{+++}, Ga^{+++}, and Fe^{+++}, Selma Greenwald, Stanley J. Pickart, and Frederick H. Grannis—1597
Crystal and molecular structure of B_5H_{11}, Louis R. Lavine and William N. Lipscomb—614
Deuterium effect on hydrogen bond distances in hafnium dihydride, S. S. Sidhu—1062
Germanium-oxygen system, Michael Hoch and Herrick L. Johnston—1376
Hafnium silicides, Benjamin Post, Frank W. Glaser, and David Moskowitz—1264(L)
Infrared dichroism in the 13.8μ band of n-$C_{36}H_{74}$ single crystals and polyethylene, Samuel Krimm—567(L)
Lattice constants of the alkali borohydrides and the low-temperature phase of sodium borohydride, S. C. Abrahams and J. Kalnajs—434
Lattice parameters of the $FeFe_{(2-x)}Cr_xO_4$ spinel system, H. J. Yearian, J. M. Kortright, and R. H. Langenheim —1196
Number of x-ray diffraction groups, C. D. West—150(L)
Reaction zone in gaseous detonations, G. B. Kistiakowsky and Paul H. Kydd—1940(L)
Redetermination of the crystal structure of lithium sulfate monohydrate $Li_2SO_4 \cdot H_2O$, Allen C. Larson and Lindsay Helmholz—2049
Studies on a group of silicon carbide structures, Richard S. Mitchell—1977
Structure of the nitric oxide dimer, W. J. Orville-Thomas —1267(L)
Structure for collagen, F. H. C. Crick—347(L)
s-Triazine. I. The unit cell, L. A. Siegel and E. F. Williams—1147(L)
